HORIZON IoT

At Horizon IoT, we specialize in IoT-powered system integration, helping organizations unify technologies, platforms, and data streams to operate more efficiently, securely, and intelligently. Our services bridge the physical and digital worlds enabling real-time insights, automation, and streamlined operations across industries. Our Core Offerings include:

- **IoT System Architecture & Integration** We design and implement scalable IoT architectures that connect devices, sensors, and platforms into unified ecosystems. Our solutions ensure seamless interoperability, real-time data flow, and optimized system performance.

- **Community Kiosk Services for Homeless** Our AI-powered, 5G-connected kiosks deliver essential services such as resource locating, health support, and job assistance. Designed for accessibility and impact, these kiosks provide real-time data to improve coordination and empower communities.

- **Application Services** We develop and deploy IoT applications tailored to specific industry needs. From smart infrastructure to connected healthcare, our solutions deliver automation, analytics, and user-centric functionality across the IoT ecosystem.

- **Artificial Intelligence** We integrate AI into IoT environments to enable systems that learn, adapt, and optimize. Our AI solutions support predictive analytics, intelligent automation, and data-driven decision-making.

- **RFID & GPS Solutions** Our RFID and GPS technologies support asset tracking, fleet management, emergency response, parking optimization, waste management, infrastructure maintenance, and environmental monitoring.

- **Point-of-Sale (POS) Systems** We deliver IoT-enabled POS systems that connect payment devices with peripherals like printers and scanners. Our solutions enhance customer experience, streamline transactions, and provide real-time sales insights.

- **Security and Surveillance** We implement IoT-based security systems using connected cameras, sensors, and AI analytics. These solutions help detect threats, monitor activity, and improve safety across facilities and public spaces.

- **Digital Signage** Our cloud-connected digital signage solutions enable dynamic content delivery and remote management. Designed for performance and scalability, they support real-time updates and audience engagement.

HORIZON IoT

- **Cybersecurity for IoT Systems** We protect connected environments with real-time monitoring, AI-driven threat detection, and automated response. Our cybersecurity overlay secures data flows, mitigates risks, and ensures compliance with evolving standards.
