**Horizon IoT LLC**

## *Capability Statement*

# CORE COMPETENCIES

### System Integration

- Community Kiosk Service Platform for Homeless
- IoT, Internet of Things, Solutions
- Digital Transformation
- Cloud Based Application Development
- AI, Artificial Intelligence, Integration
- RFID, GPS Solutions
- Location Tracking, Indoor Navigation and Asset Management
- Point of Sales, POS, systems
- Security and Surveillance Solutions
- Digital Signage Solutions

### Consultancy in Technology, Business and Management

- Business Development
- Go-to-Market (GTM)
- Strategic Planning
- Contract Negotiations
- Project Management
- Organizational Development
- Risk Management
- Board-level Advisory Services

# EXPERIENCE

### WA Department of Enterprise Services (DES)

- **State:** Washington
- **Contract #:** 04618
- **Contract Title:** Radio Frequency Identification (RFID) Solutions
- **Contractor Role:** Prime
- **Type of Contract:** IDIQ
- **Annual Estimated Value:** \$2M
- **Date Awarded:** 04.01.2025
- **Period of Performance:** 05.01.2025 - 04.30.2027
- **Place of Performance:** Washington and Oregon
- **SOW:** Providing services, products, equipment, and software to implement complete RFID solutions.

## Cyber Security

- **Advanced Threat Intelligence:** Leverage AI to detect and neutralize cyber threats, ensuring continuous protection of DoD systems.
- **Zero Trust Architecture:** Implement a Zero Trust model to enforce strict access controls, minimizing attack surfaces.
- **Compliance and Readiness:** Ensure full compliance with CMMC and continuously enhance cyber readiness.

## Autonomous Systems and Robotics

- **AI-Enhanced Autonomy:** Develop AI-driven autonomous systems for real-time decision-making in complex environments.
- **Unmanned Systems Integration:** Deploy unmanned systems that integrate seamlessly with existing DoD infrastructure.
- **Operational Safety:** Enhance the safety and reliability of autonomous systems with advanced sensors and machine learning.

## Converging AI, Cloud, Computing and Edge Computing

- **Real-Time Data Processing:** Enable real-time analysis with edge computing at the data collection point.
- **Scalable AI and Cloud Integration:** Provide scalable AI models on secure cloud platforms for rapid deployment.
- **Unified Command and Control:** Integrate AI, cloud, and edge computing into a unified command and control platform.

## Unified Networks – Connected Force Using 5G

- **5G-Enabled Connectivity:** Deliver low-latency, high-bandwidth 5G networks for real-time battlefield communication.
- **Secure and Resilient Networks:** Build secure 5G networks with enhanced encryption to protect DoD communications.
- **Interoperability Across Platforms:** Ensure seamless 5G integration with existing military communication systems.

## Software as a Service Platform (SaaS)

- **Agile Software Deployment:** Offer rapid deployment and scaling of SaaS solutions to support mission-critical operations.
- **Centralized Data Management:** Enable centralized data storage and sharing for enhanced collaboration.
- **Continuous Improvement:** Provide SaaS platforms with ongoing updates to leverage the latest technologies.
