

Thank you for your interest in ABA Plus, Inc.

We provide in-home and community-based ABA (applied behavior analysis) services to individuals with challenging behaviors. We specialize in working with children and individuals with autism and other developmental disabilities and consult with parents, school personnel, and other service providers to coordinate treatment and reduce maladaptive behaviors.

In order for us to initiate intake process with Insurance provider, we need you fill and provide following information –

- a. Insurance Intake Form (download the form)
- b. Copy of your Insurance Card
- c. Diagnosis Report
- d. Doctor Referral Form
- e. Exit Report and Assessment from your previous company.

When we have all information, we will contact the insurance company to verify coverage and request a 8-10 hours assessment. The assessment (if authorized) will consist of at least 2-3 observations. The initial appointment/observation will be with the primary caregiver(s) and the assessor(s).

During this appointment we will go over our policies and procedures and get background information on the most problematic behaviors and concerns. The next observation will be with the client/patient in the home environment, preferably during a time/place identified during the initial observation as one of the most problematic. Once all observations are completed, we will develop goals and objectives in alignment with the observations and client/caregiver input and report this back to the funding source for final approval.

If you have any questions, please don't hesitate to reach out. We want to ensure you understand our services and have the information you need to access them.

Thank you.

Suddha Mukhopadhyay, M.A, BCBA
