Detectamet

Detectamet work in partnership with BRCGS through the Partner Connection Programme

Our pens are made from shatter resistant FDA/EU Food grade materials which contain a detectable additive, making them detectable by foreign body detection equipment, and are designed without small parts that can break off and enter the food chain.

From 2020 all standard/fine tip ink will be manufactured using our fully detectable pen refills.

10

Ink Types

Detectamet's pens and refills come in four different types of ink and **it's important you choose the right ink for the correct working environment**. Standard inks are not suitable for cold and wet areas.

Ink type	Which environment is it suitable for?	Available colours	Notes
Standard	Ambient conditions 0°C up to 30°C (32 to 86°F). Writing line width 1mm (39.4 mils)		
Pressurised Cryo	Extreme colds -15°C up to 60°C (5 to 140°F) E.g. freezers/cold stores; wet areas; powdery surfaces; greasy surfaces, underwater, writes upside down. Writing line width 1.2mm (47.2 mils) Unlimited shelf life		<i>Due to the pressurised nature which maintains a consistent ink flow, it's important to clean the nib frequently to limit the build-up of ink</i> <i>Unlimited shelf life</i>
Fine tip	Ambient conditions. Writing line width 0.7mm (27.6 mils)		
Gel	Ambient conditions -5°C up to 30°C (23 to 86°F); cold environments; dusty environments. Writing line width 0.7mm (27.6 mils)		

Safety Chains and Split Ring Attachments

10
PACK

Retractable markers are unique and can easily get lost, so why not have safety chains and split ring attachments fitted to your pens?

To order use product codes:

Split Ring	153-T203
Safety Chain	155-P44-S083-A93

Metal Detectable & X-Ray Visible Stationery

Pen Codes

We understand product codes can be confusing, as we offer such a wide range of pens. Please see the guide below to show how to work out the code for our most popular pens.

If you are uncertain in any way, talk to our sales team for guidance.

HD and Elephant Retractable Pens

E.g. 101-I01-C11-PA01 **HD Retractable pen** with **blue standard ink**, **blue housing** and **blue end cap with clip**.

TYPE OF PEN		TYPE TYPE		INK COLOUR	HOUSING COLOUR	CAP COLOUR	CLIP TYPE	
101	HD Retractable	10	Standard	1	C1	1	PA01	with clip
104	Elephant Retractable	11	*Cryo	2	C2	2	PA02	without clip
		12	Gel	3	C3	3	PA03	lanyard
		13	*Fine tip	4	C4	4		
					C5	5		
					C6	6		
					C7	7		
					C8	8		
					C9	9		

*Cryo and Fine Tip ink only available in blue and black

Elephant One-Piece Pens

Only available with standard ink and no cap.

E.g. 105-C101-I01-PA01 **Elephant One-Piece pen** with **blue housing**, **blue standard ink**, with clip

TYPE OF PEN	HOUSING COLOUR	INK COLOUR	CLIP TYPE
105 Elephant One-Piece	C101	I01	PA01 with clip
	C110	I02	PA02 without clip
	C103	I03	PA03 lanyard
	C104	I04	
	C105		
	C160		
	C107		
	C108		
	C109		

HD One-Piece Pens

Only available with standard ink and no cap.

E.g. 116-I02-C103-PA03 **HD One-Piece pen** with **black standard ink**, **red housing** with lanyard

TYPE OF PEN	INK COLOUR	HOUSING COLOUR	CLIP TYPE
116 HD One-Piece	I01	C101	PA01 with clip
	I02	C110	PA02 without clip
	I03	C103	PA03 lanyard

Detectamet

Metal Detectable & X-Ray Visible Stationery

Heavy Duty (HD) Retractable Detectable Pens

FR: Stylo rétractable robuste ES: Bolígrafo retráctil de alta resistencia DE: Extrastarker Druckkugelschreiber

These are our best-selling retractable metal detectable and X-Ray visible pens, designed to be extremely durable and shatter proof – minimising any risk of foreign body contamination.

Made from Detectamet's unique detectable polymer, the rugged construction makes it resilient, so it won't break under stress, whilst the ergonomic grip allows a firm hold in a wide range of environments.

elephant
DETECTABLE PEN

**MADE IN
BRITAIN**

Retractable Detectable Pens

FR: Style rétractable éléphant ES: Bolígrafo retráctil Elefant DE: Druckkugelschreiber Elefant

Part of Detectamet's range of detectable pens, Elephant retractable pens are made in the UK using our unique detectable polymer.

Each component is metal detectable and X-Ray visible and is specifically designed for the food safety industry to minimise risk of foreign body contamination from parts breaking off and entering the food chain.

As with all Detectamet's products, it's shatter proof and incredibly durable, and to minimise your environmental footprint it can be filled with a fully detectable refill to extend its life.

Metal Detectable & X-Ray Visible Workwear & PPE

Metal Detectable & X-Ray Visible Detectable Plasters/ Bandages

FR: Pansements détectables

ES: Tiritas detectables

DE: Metalldetektierbare Heftpflaster

Hygiene is of paramount importance in the food processing industry.

Our innovative range of detectable plasters are blue in colour and offer a dual detection system, making them detectable by both metal and X-Ray inspection systems – required under BRCGS Issue 8. They are also fully FDA 21 CFR Part 807 approved.

Available in eight popular sizes, these detectable plasters come in packs of 50 or 100 dependent on size. We also offer an assorted pack of 100 containing multiple sizes:

Colour:

DESCRIPTION	PACK SIZE	PRODUCT CODE
Detectable Plasters 38mm x 38mm (1 1/2 x 1 1/2")	100	403-S124-X11
Detectable Plasters 19mm x 63mm (3/4 x 2 1/2")	100	403-S731-X11
Detectable Plasters 30mm x 64mm (1 3/16 x 2 1/2")	100	403-S732-X11
Detectable Plasters 19mm x 72mm (3/4 x 2 13/16")	100	403-S733-X11
Detectable Plasters 25mm x 72mm (1 x 2 13/16")	100	403-S734-X11

Own Branding and Sequential Numbering

Using our in-house Pad printer we can offer a cost effective solution for branding your detectable products at an economical price. It offers superior quality one and two colour print on 3D irregular, curved and textured objects, making it perfect for our products.

We also offer an in-house laser service for branding and serialisation.

Using detectable equipment is an essential step towards preventing foreign body contamination. However, mistakes do happen, and equipment can go missing during a shift.

Sequential numbering gives you complete traceability and is particularly important if production presents higher risks, making it even more important to eliminate any type of contamination.

Our **laser engraving** service adds sequential numbers onto your products. This allows you to record products issued to staff at the start of a shift, check against that record at the end of the shift and if a missing tool is discovered, investigate its whereabouts immediately.

Where pad printing and laser engraving are not appropriate - due to the product - we can print your logos at point of manufacture, e.g. keyhole tags, test pieces.

Please ask a member of our team for advice and further information.

Metal Detectable & X-Ray Visible Flexible Or Rigid Scraper With Stainless Steel Blade

FR: Grattoir à poignée en plastique
ES: Rasqueta con mango de plástico
DE: Schaber mit Plastikgriff

1
PACK

**MADE IN
BRITAIN**

Available with either a rigid or flexi stainless steel blade, the plastic grip handle of this scraper is fully detectable.

Features & Options

- Metal detectable
- X-Ray visible
- Stainless steel blade with fully detectable handle
- Suitable for pad printing/laser engraving
- Manufactured from EU & FDA food contact approved detectable polymer

Sizes

- flexi: 120 x 100mm (4 x 3 15/16")
- rigid: 150mm x 125mm (5 7/8 x 4 15/16")

ES: Plástico para retractilar palets

DE: Palettenfolie

A high proportion of foreign body contamination is due to bulk packaging failure, so we have developed pallet wrap manufactured from detectable polythene.

Detectamet

Metal Detectable & X-Ray Visible Storage, Mixing & Handling

Detectamet Offer Own Branding & Sequential Numbering

Perfect for knives and other products, sequential numbering is done in-house on our laser engraving machine.

Sequential numbering gives you complete traceability and is particularly important if production presents higher risks, making it even more important to eliminate any type of contamination.

Our cost effective laser engraving service adds sequential numbers onto your products.

How about branding your detectable products using our cost effective pad printer?

Pad printing offers superior quality one and two colour print on 3D irregular, curved and textured objects, making it perfect for our products.

Where pad printing and laser engraving are not appropriate - due to the product - we can print your logos at point of manufacture, e.g. keyhole tags, test pieces. Ask a member of our team for advice.

Can't see what you're looking for?

Or are you looking for a detectable product for a specific project or application?

Don't worry! We're always happy to talk about bespoke products and will always try our best to find a solution.

Metal Detectable Safety Knives

SAFETY KNIVES

We offer a wide range of detectable safety knives to suit all areas of your business.

Safety knives are essential for opening packaging materials safely whilst preventing potential contaminant risks.

They are either spring-loaded with self-retracting blades or have fully enclosed blades.

One knife can't do all jobs - otherwise it will break, or an alternative, unsafe solution will be used by the operator.

Ask these questions to determine the most suitable knife:

- What are you cutting?
- What are you permitted to use?
e.g. open or concealed blade
- What are you using now?

Metal Detectable Safety Knives

Detectable Safety Knife Features

Ensure you choose the correct knife for your required purpose by consulting the Safety Knife Features outlined below and listed on each product description.

Replacement Blades Available

We offer replacement blades for many of our safety knives.

Cardboard

Suitable for cutting through cardboard packaging. For consistent cutting of thicker cardboard, we recommend our Heavy Duty Knife Range.

Plastic Wrapping

Suitable for cutting through plastic wrapping.

Sacks/Plastic Bags

Suitable for cutting through plastic sacks and bags.

Plastic Netting

Suitable for cutting through plastic netting.

Plastic Adhesive Tape

Suitable for cutting through plastic adhesive tape.

Bubble Wrap

Suitable for cutting through bubble wrap.

Plastic Strapping

Suitable for cutting through plastic strapping, usually found wrapped around cardboard boxes.

Retractable Blade

Some of our detectable knives are retractable for added safety.

Disposable Knife Range

A lightweight, shorter-lasting knife that is disposable. Suitable for lighter materials such as thinner cardboard and plastic wrapping.

Normal Duty Knife Range

A longer-lasting knife, capable of cutting a variety of products, from lighter materials to thicker plastics and card.

Heavy Duty Knife Range

Our longest lasting range of knives, resilient to consistent cutting of thicker packaging, including heavy duty cardboard.

Metal Detectable & X-Ray Visible Locking Knife with Clip Point Blade

FR: Couteau verrouillable avec lame clip point

ES: Navaja con hoja punta de clip

DE: Feststellbares messer mit clip-point-klinge

1
PACK

This heavy duty locking knife comes with a blue detectable handle and has a stainless steel clip point blade, making it ideal for general purpose use.

Features & Options

- Metal detectable
- X-Ray visible
- High carbon stainless steel lockable blade
- Pointed blade is useful for piercing materials

DETECTABLE

- Also available with a shackle (additional cost applicable)
- Blade length: 70mm
- Suitable for pad printing/laser engraving
- This is not a safety knife

Metal Detectable & X-Ray Visible Professional Knives

PROFESSIONAL KNIVES

Our detectable professional knives are made from fully hardened and tempered stainless steel to ensure maximum edge retention.

The handles are manufactured from EU & FDA food contact approved detectable polymer.

To achieve maximum hygiene levels, handles are insert moulded to the blades, preventing build-up of contaminants and allowing it to withstand rigorous sterilising and dishwasher use.

Handles

Depending on knife function and frequency of use, handles come in two different shapes:

Regular – designed for holding the knife safely and comfortably for long periods

Ergo – designed for all day use by reducing stress to the hand and wrist and providing thumb support

Edges and Blades

We offer three different types of blade, dependent on function:

Plain – ensures a fine, robust, long lasting edge, predominantly used in the meat processing industry.

Serrated/wavy – the teeth along the blade edge allows a tough cut, whilst protecting the softer inner of a product. This is the perfect edge for cutting bread and pastry.

Scalloped – with scallops running on each side of the blade, air can enter between the blade and cut products, allowing the cut slice to easily fall away making it perfect for slicing meat.

Colour Coding System

It is crucial to minimise the spread of contamination when dealing with certain allergens that could present a serious threat to health or life. To minimise this risk our knife handles are available in nine detectable colours.

Detectamet

Metal Detectable & X-Ray Visible Professional Knives

Detectamet Offer Own Branding & Sequential Numbering

Perfect for knives and other products, sequential numbering is done in-house on our laser engraving machine.

Sequential numbering gives you complete traceability and is particularly important if production presents higher risks, making it even more important to eliminate any type of contamination.

Our cost effective laser engraving service adds sequential numbers onto your products.

How about branding your detectable products using our cost effective pad printer?

Pad printing offers superior quality one and two colour print on 3D irregular, curved and textured objects, making it perfect for our products.

Where pad printing and laser engraving are not appropriate - due to the product - we can print your logos at point of manufacture, e.g. keyhole tags, test pieces. Ask a member of our team for advice.

Can't see what you're looking for?

Or are you looking for a detectable product for a specific project or application?

Don't worry! We're always happy to talk about bespoke products and will always try our best to find a solution.

Metal Detectable & X-Ray Visible Engineering

Metal Detectable & X-Ray Visible Detectasil® Silicone Caulk

FR: Joint au silicone Detectasil®

ES: Sellante de silicona Detectasil®

DE: Detectasil® Silikonichtmittel

This innovative product, detectable by both metal detectors and X-Ray detection systems, is perfect for use in structural fitting and equipment installation within food processing areas, reducing your risk of undetected foreign body contamination of food.

Detectasil® is a neutral cure sealant, which offers better adhesive properties for a greater number of materials including PVC-U, most other plastics, glass, aluminium, lead, stone and masonry and Polycarbonate.

MOULDED TUBES

OD: 40 - 1815mm (1 9/16 - 71 7/16")
ID: 15 - 1740mm (9/16 - 68 7/8")
Max Length: 300mm up to 350mm OD (11 13/16" up to 13 7/8" OD)
100mm up to 1815mm OD (3 15/16" up to 71 7/16" OD)

MOULDED RODS

OD: 30 - 700mm (1 3/16 - 27 9/16")
Max Length: 300mm up to 330mm OD (11 13/16" up to 13" OD)
100mm up to 700mm OD (3 15/16" up to 27 9/16" OD)

MOULDED SHEETS

600mm - 1000 x 2000mm (23 5/8" - 39 3/8" x 78 7/8")
Thickness: 4 - 100mm (3/16 - 3 15/16")

Metal Detectable & X-Ray Visible Engineering

Metal Detectable & X-Ray Visible 'Detectathane' Polyurethane Belting

FR: Courroies en polyuréthane

ES: Correas de poliuretano

DE: Polyurethan-gurt

This blue polyurethane contains a metal detectable additive. It is FDA and EU approved, specifically designed for use in the food processing and packaging industries where it is traceable by conventional detection systems. *Results may vary depending on the sensitivity of the metal detection system being used.*

It is specifically targeted for extruded profiles, film and sheet applications and it exhibits the excellent abrasion resistance and properties found with standard thermoplastic polyurethanes (TPU) whilst also being metal detectable.

This is a bespoke product so please talk to a sales representative for more details.

Metal Detectable & X-Ray Visible PA6 Filled Nylon

FR: Nylon renforcé en PA6

ES: Nylon con poliamida 6

DE: Nylon mit PA6-Füllung

This blue polyamide 6 grade contains a metal detectable additive. It is FDA and EU approved, specifically designed for use in the food processing and packaging industries where it is traceable by conventional detection systems. Detectable Filled Nylon presents good mechanical strength, stiffness, impact strength and wear resistance.

This is a bespoke product so please talk to a sales representative for more details.

Metal Detectable & X-Ray Visible Engineering

Metal Detectable & X-Ray Visible PEEK

FR: PEEK
ES: PEEK
DE: PEEK

This dark grey PEEK contains a metal detectable additive. It is FDA and EU approved, specifically designed for use in the food processing and packaging industries where it is traceable by conventional detection systems. *Result may vary depending on the sensitivity of the metal detection system being used.*

It is designed for multiple sterilisable machine parts and continual use up to 250°C (482°F) in applications where good wear resistance is necessary for high line speeds, mainly in equipment with CIP or SIP (cleaning or sterilisation in place) requirements.

This is a bespoke product so please talk to a sales representative for more details.

Metal Detectable & X-Ray Visible Mat

FR: Tapis pour l'industrie agroalimentaire
ES: Tapete para procesar alimentos
DE: Lebensmittelmatte

This detectable rubber mat was designed specifically for use in food processing areas. The raised knobs allow air flow around machine parts, helps prevent bacterial growth and provides an effective non-slip surface.
