

"Carrie is a model math educator. My children looked forward to their problem solving math pods with her. They enjoyed spending time with her and engaging in math activities that were fun, challenging, and interesting. They were challenged to think in new ways and to try different ways of solving problems. Their confidence and interest in math grew as a result of successfully completing non-routine math problems and having aha moments with Carrie. Her instruction brought to life and added a fun spin to the concepts and skills learned in the traditional classroom setting. I am thankful for how she inspired my kids, esp. to persevere as problem solvers and as young mathematicians."

- Hastings Parent and Lifelong Westchester Educator

"Carrie has been most influential in my professional growth as a mathematics teacher. She has a brilliant, flexible and creative mind that has been paramount in creating a cooperative learning group of teachers. Likewise, she is amazing with students, always pushing them to think for themselves and come to their own understanding."

- 5th grade teacher, Scarsdale

"When my daughter Lily was 7 years old, she had math anxiety. She hated math and couldn't get it. Carrie has this amazing ability to flex her communication style to ensure the student she is working with feels comfortable with her, so that the learning process could actually be fun. She worked with Lily on her math skills, but it went far beyond that. Not only did she make Lily see that she could understand the concepts in math, but that she was good at it. And on top of that, it was actually something she enjoyed. Thank you, Carrie. You are truly an amazing educator."

- Parent, TriBeCa & Harrison

"Carrie O. helped us unfold mathematical systems, modeled how to differentiate lessons, and helped us problem solve questions and concerns we had about our students learning behaviors. Carrie was very professional and also very kind, considerate and funny. I was a pleasure working with her."

- Kindergarten teacher, North Salem

"Carrie changed the way I look at math and numbers! Math used to be my least favorite subject to teach and now it is my favorite. My math teaching is stronger and in shaping my teaching. She has changed the lives of many students. Watching her teach is mesmerizing-she is non-judgmental and has the ability to ask deep and thoughtful questions, allowing you to arrive at the answers on your own. She helps foster understanding for both students and teachers."

- 1st/2nd Grade Teacher, Scarsdale

"I have had the privilege of working with Carrie as she developed a professional learning group of teachers who focused on improving their math instruction. She has pushed us beyond our comfort zone and it really encouraged me to challenge myself, which in turn challenges my students. Her creative, passionate and supportive approach to learning has been amazing to see and be a part of! I am forever grateful for the guidance she has given me!"

- 3rd Grade Teacher, Scarsdale

"Carrie's kindness and warmth immediately put me at ease. Carrie was my mentor as a coach and I never felt judged by her, but rather that she was in my corner and was there to help me grow, develop, and refine my skills. Carrie has a keen knack for zooming in on what you are doing well and identifying specific areas of growth. Carrie can quickly get to the heart of the matter while simultaneously helping you to develop the tools so you can do this yourself."

- Math Coach, Metamorphosis

"Carrie has done incredible work helping my sixth grader feel like he is a math person! His confidence as a mathematician has grown tremendously because of the thoughtful and purposeful work she does with him. We are so grateful to have such an enthusiastic and patient teacher on our side."

- Parent & Teacher, Scarsdale
