

# TITAN Simulation Small Moulage Kits

Are you properly trained?

Cast from actual combat wounds

Silicone casts of patients wounds directly of injuries no sculpting, just real.

Hand painted intrinsically.

Paint doesn't come off, long lifespan

On skin, on sleeve, or on suit

Multiple uses for quick application under different training environments

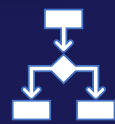

Better skills

Confidence

Bandaging

Decision

## KEY FEATURES

- Accurate tissue fidelity with realistic skin tissue planes, fat thickness, movement, and coloring.
- Unparalleled anatomic fidelity, with patient specific anatomic replica and materials that emulate the look and feel of human tissues.
- Emulates the most common wounds. GSW, laceration, burn, avulsion, puncture, and blisters.
- Choice of 3 varieties (or mix and match 40 injuries):
  - plain silicone sticky backing for no edge application and removal.
  - Velcro strap for extremities
  - Expandable over-clothing garment with Velcro patches

## FOR EVERYONE

Better materials

Realistic looking and feeling tissues

## FOR PATIENTS

Better outcomes
