When Judas had left them, Jesus said, "Now is the Son of Man glorified, and God is glorified in him. If God is glorified in him, God will also glorify him in himself, and God will glorify him at once. My children, I will be with you only a little while longer. I give you a new commandment: love one another. As I have loved you, so you also should love one another. This is how all will know that you are my disciples, if you have love for one another."

Cuando Judas salió del cenáculo, Jesús dijo: "Ahora ha sido glorificado el Hijo del hombre y Dios ha sido glorificado en él. Si Dios ha sido glorificado en él, también Dios lo glorificará en sí mismo y pronto lo glorificará. Hijitos, todavía estaré un poco con ustedes. Les doy un mandamiento nuevo: que se amen los unos a los otros, como yo los he amado; y por este amor reconocerán todos que ustedes son mis discípulos".

Wisdom from Fr. Nick/Sabiduria del Padre Nick

WHAT ARE YOU LOOKING FOR?

A certain man went to church one Sunday! He frowned when the organist missed a note. He stared menacingly at two whispering teenagers. He looked repeatedly at his watch. When the collection basket was passed, he felt the collector was watching to see how much he gave. During the homily, he felt pleased with himself that he caught the preacher making a grammatical error. He was tight-lipped during the hymn singing. As he slipped out the side-door on the way from the altar after Communion, he muttered to himself, "That was terrible. Why do I bother ... ?" A certain man went to church one Sunday! He chuckled at the sight of a father exchanging hugs with the toddler draped over his shoulder. At the collection, he wondered if he was giving enough. He struggled with the scripture readings trying to pick out something to live by. A thought from the homily helped him with a question he had often thought about. He enthusiastically joined in the hymn at the closing of liturgy. As he left the church and observed all the other people, he felt a sense of belonging and a joy in their having been in God's Presence together. Both men had gone to the same church on the same Sunday, and each found what he was looking for. What are you looking for?

¿QUÉ BUSCAS?

¡Cierto hombre fue a la iglesia un domingo! Frunció el ceño cuando el organista se saltó una nota. Miró amenazadoramente a dos adolescentes que susurraban. Miró repetidamente su reloj. Cuando pasó la canasta de la colecta, sintió que el recaudador estaba mirando para ver cuánto daba. Durante la homilía, se sintió complacido consigo mismo al descubrir que el predicador cometía un error gramatical. Tenía los labios apretados durante el canto del himno. Mientras salía por la puerta lateral camino del altar después de la Comunión, murmuró para sí mismo: "Eso fue terrible. Por qué me molesto ... ?" ¡Cierto hombre fue a la iglesia un domingo! Se rió entre dientes al ver a un padre intercambiando abrazos con el niño sobre su hombro. En la colecta, se preguntó si estaba dando lo suficiente. Luchó con las lecturas de las Escrituras tratando de elegir algo por lo que vivir. Un pensamiento de la homilía lo ayudó con una pregunta en la que había pensado a menudo. Se unió con entusiasmo al himno al final de la liturgia. Al salir de la iglesia y observar a todas las demás personas, sintió un sentido de pertenencia y gozo por haber estado juntos en la presencia de Dios. Ambos hombres habían ido a la misma iglesia el mismo domingo, y cada uno encontró lo que buscaba. ¿Qué estás buscando?

NATURE'S IMMUNE MESSENGER
Richard Bennett, PhD
Health Sciences Advisory Board Member

When I was about nine years old, I witnessed the birth of a new foal. It was important for the newborn foal to get a bellyful of colostrum because it contained mom's immune memory and more. Little did I realize this much later, I would do research on colostral transfer factors.

Nature has empowered its immune systems of all higher animals with the ability to transfer memory. Without this, the body experienced a threat, the immune system would have to work to form a new immune response. New immune responses take time, and microbial health threats exploit the time lag if they can.

In 1949, Dr. H. Sherwood Lawrence discovered that the contents of immune cells, when harvested and injected into another person, could transfer immune memory. The observation amazed Dr. Lawrence so much that he named the molecule transfer factor.

Transfer factors are unique polypeptides that encode the identity of a microbe in 3D. They create a unique pattern, like a footprint in the sand.
