Arewa Consultative Forum supports the rigged and booby-trapped 1999 Constitution so it could not be amended. Below is the proof...

**“**The six (6) geo-political zones in Nigeria should not be recognised in the 1999 Constitution because doing so will increase the cost of governance. Those who are agitating for the six geo-political zones to be included in the Constitution want a ‘confederal’ arrangement which will make the federal government very weak - preparatory to Nigeria’s disintegration. We don’t want State Police because our democracy is not ripe for it. If the 36 State governors take charge of the police in their States there will be disunity in Nigeria. Let us retain the federal police system as it is.”

When the cabal -Hausa/Fulani/Yoruba/Edo that took down Biafra with the help of the British are once again coalescing into CPC, SESS must take note of that horror
