

## **Notification relating to Rebated Diesel and Rebated Biofuels – Effective 1st April 2022**

01/04/2022

To Whom It May Concern

We are writing to notify you of some changes that come into force as of 1st April 2022.

The government has made a decision to restrict the use of rebated diesel (known as red diesel) and they will therefore no longer be allowed to be used as they are currently.

As a company, we will only supply on delivery **WHITE HVO FUEL**. Upon return, all machines **MUST** be filled with “**white fuels**” only – **WHITE HVO** or **WHITE DIESEL**.

Any **RED FUEL** which is left in equipment when it is returned will be disposed of and the disposal costs per litre along with a full tank of fuel will be chargeable.

These are necessary steps to ensure our compliance to this government directive and we feel assured that we will have the full support of our customers.

The GOV.UK website outlines further details on who is affected by this charge and the full policy objective: [Reform of red diesel and other rebated fuels entitlement - GOV.UK \(www.gov.uk\)](https://www.gov.uk/government/news/reform-of-red-diesel-and-other-rebated-fuels-entitlement)

If you have questions or queries regarding the changes, please contact your local depot.

Yours faithfully

**PIRNMILL ACCESS SOLUTIONS**
