
WINDOW JAMB EXTENSIONS

TRIM RITE MFG.

(Hopper Style)

Because of the hardware on Hopper Windows, we need to ensure that the PVC jamb will fit around it.

Please take a width measurement from just outside to just outside of the hinges. (See Red)

Please take a height measurement from just under the latch hardware to about 1/2" above the window fold line. Please make note that that was done. (See Blue)

Please take depth measurements as usual from the face of the window to the outside of your drywall. (See Yellow)
