

PVC WINDOW JAMB EXTENSION FORM (DRYWALL RETURN FORM)

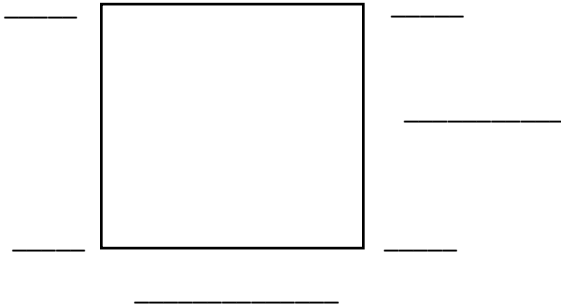

The depth of the wall usually varies from corner to corner. This means that if we did one standard depth for all 4 corners, the installer would have to plane/sand off any material overhang once the jamb is installed. To avoid this hassle, we request the depth of each corner so that we can do our best to achieve a flush window jamb.

Ex. Kitchen South

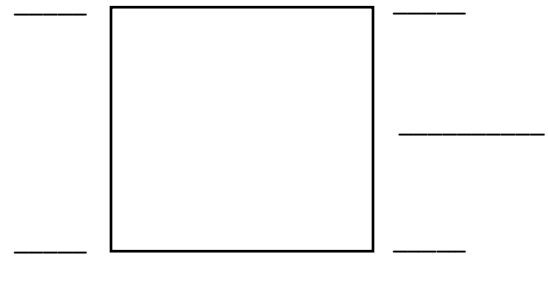

If your windows currently have drywall returns (U-Channels), please measure from the inside to the inside of your return. Remember to take the depth measurement from the back of the return as the jamb will slide into the return.
