

AFTER

BEFORE

Our new cable handrail system can quickly change an 80's house into a current house with very little cost and time. In this home, the owner removed the old handrail and flooring. They installed new flooring and skirt boards on the stairs. They installed the new handrail system in one weekend themselves. Note: the current grabber does not meet code. The grabber they used can be removed and one that meets code can easily be installed. GC Handrail, we have step by step videos on our website on how to install.
