

Collection of Immunization Data for Children in Daycares

Ontario's Child Care and Early Years Act, 2014 (CCEYA) states that a child care centre must ensure that all children in their centre have complete immunization appropriate to their age **prior** to admission to the child care centre. A record of immunization must be kept as part of each child's record and updated as new immunizations are received.

SECTION A: Complete the following information for your child

Last Name:	First Name:	Date of Birth: <small>yyyy / mm/dd</small>
Other Names if Applicable:		Sex: <small>M / F</small>
Address:	City/Town:	Postal Code:
Parent/Guardian's Name:		Home #:
Daycare your child is attending:		Work or Cell #:

SECTION B: Attach your child's immunization record/exemption

- If your child has already been vaccinated, please attach a photocopy of your child's immunization record to this form and return to the daycare.
- If your child has already completed an exemption under the Child Care and Early Years Act (CCEYA) (two pages), please attach a photocopy of your child's exemption to this form and return to the daycare.

Date:	Parent/Guardian Signature:
-------	----------------------------

Publicly Funded Immunization Schedule for Ontario

	2 Months	4 Months	6 Months	12 Months	15 Months	18 Months	4-6 Years
DTaP-IPV-Hib * <small>Diphtheria, Tetanus, Pertussis, Polio, Haemophilus influenza type b</small>	✓	✓	✓			✓

Rot-1 <small>Rotavirus</small>	✓	✓					
Men-C-C * <small>Meningococcal Conjugate C</small>				✓			
MMR * <small>Measles, Mumps, Rubella</small>				✓			
Var * <small>Varicella</small>					✓		
MMRV * <small>Measles, Mumps, Rubella, Varicella</small>							✓
Tdap-IPV * <small>Tetanus, Diphtheria, Pertussis, Polio</small>							✓

NOTE: Vaccines with an asterisk are required for attendance at daycare and school.

PLEASE RETURN THIS FORM IMMEDIATELY TO YOUR DAYCARE PROVIDER ALONG WITH A COPY OF YOUR CHILD'S IMMUNIZATION RECORD OR EXEMPTION FORM.

Collection of this information is authorized under the Child Care and Early Years Act, 2014 (CCEYA). This information is used to ensure that all appropriate personal care and public health services are provided and the necessary statistics are kept. Questions about this collection should be directed to the daycare operator.

For more than 200 years vaccines have been saving lives around the world! Get the vaccines and protect your family against the following diseases.

Pertussis (whooping cough)

Whooping cough is a contagious disease that causes prolonged cough in children, adolescents and adults. Whooping cough can be serious in infants. This cough can cause children to vomit or stop breathing for a short period of time. It can also cause serious complications such as pneumonia, as well as brain damage and seizures in babies.

Varicella (chickenpox)

Chickenpox is a contagious disease that can cause fatigue, mild headache, fever up to 39° C, chills and muscle or joint aches a day or two before a red, itchy, blister-like rash begins. Complications from chickenpox can be serious and include bacterial skin infections, ear infections, and pneumonia.

Meningococcal disease

Meningococcal infections can cause serious diseases, including meningitis. Meningitis is a very serious infection that occurs in people who have either come in contact with an otherwise healthy person who is a "carrier" or come in contact with another person sick with the disease. Meningococcal disease can also cause blood poisoning and infections of the brain and spinal cord.

Tetanus

Tetanus or lockjaw is a serious disease that can happen if dirt with the tetanus germ gets into a cut in the skin. It can cause cramping of the muscles and dangerous convulsions.

Diphtheria

This is a serious disease of the nose, throat and skin. It causes sore throat, fever and chills. Diphtheria can be complicated by breathing problems, heart failure and nerve damage.

Polio

Polio is a serious disease that people can get from drinking water or eating food with the polio virus in it. It can also be spread from person-to-person. Polio can cause nerve damage, paralyze someone for life and also cause death.

Mumps

Mumps is a contagious disease caused by a virus and is characterized by fever, headache as well as swelling of the cheek, jaw and neck. It can cause complications such as hearing loss and inflammation of the brain.

Measles

Measles is a highly contagious viral infection. It causes high fever, cough, rash, runny nose and red eyes. Measles can cause complications such as ear infections and pneumonia.

Rubella

Rubella is a contagious disease caused by a virus. Rubella may cause fever, rash, headache, mild runny nose and red eyes (conjunctivitis). It can cause serious complications in pregnant women and their babies, and arthritis in adults.

Vaccination is the best way to protect you and your family against illness.
