

# AUDIT ASSISTANCE

Did you know every Workers Compensation Policy requires an Audit at the Policy Expiration?

**Q**CPS can accurately dissect your workers compensation environment and successfully complete: online, paper or physical audits. Our expertise in workers compensation insurance will guarantee that your business will be in compliance with your carrier, as well as, state regulation.

When your policy expires, it is important to understand that without an audit your workers compensation insurance expenses will be more than you need to pay.

To prevent an estimated audit, which could have you paying more for your insurance premium, our auditing techniques can help protect your profits. Also, to receive bonus credits for future premium reduction, an audit request answered and completed in a timely fashion is important.

In addition to our workers compensation audit assistance, we can also assist with general liability audits. Our techniques allow us the opportunity to recoup some unnecessary premium expenses you may have over paid.

*I have so much going on right now but knowing you are the type of professional that responds promptly, provides clear and concise explanations, resourceful and relatable. You put a new customer like me at ease I just wanted you to know, from one small business professional to another, that I appreciate you.*
