

# MOD ANALYSIS

Understanding your workers compensation insurance environment.

This program explains and presents premiums paid vs. losses, and losses incurred over losses expected.

- It offers a business insight, uncovers actionable problem areas and improves your impact on total workers compensation costs.
- It is important to analyze this data because employee and workers compensation insurance are affixed costs in a business budget.
- Performing and reviewing an analysis can enlighten a business to a problem area – see an incurred cost approaching – learn the performance of safety programs – assist your company with saving for growth and development of other areas your business may need.
- With this one-of-a-kind software and the guidance of Queen City Professional Services you will immediately understand this sector of your business and you will be able to PLAN for successful business growth & employee safety

Up your game and protect your profits.  
Begin your Queen City Mod Master Experience today!

*“You know that feeling...you are drowning in confusion and high unfair costs and you have no idea what’s up? I had that experience working with Comp Insurance...and if I didn’t get it straight it may have cost me my business...I was drowning...until a life preserver came alone...that was Karen Catalano.”*
