

WORKERS COMPENSATION

Defining the importance of workers compensation insurance and state non-compliance.

Workers compensation is a form of insurance providing wage replacement and medical benefits to employees injured in the course of employment, in exchange for mandatory relinquishment of the employee's right to sue his or her employer for the tort of negligence.

Workers compensation protects your business from lawsuits stemming from workplace accidents. It is also a mandatory policy in almost all 50 States for businesses with employees.

Workers' Compensation Non-Compliance

A non-compliance notification is issued by your state due to the lack of proper Workers Compensation Insurance coverage in place at the time of hiring employees and issuing payroll.

This can be financially detrimental to your business if this letter goes unanswered. The state will fine your company \$200 a day for every day you are without workers compensation coverage, costing more than the correct workers compensation policy coverage.

We are here to help up your game and protect your profits! The inquiry form is intimidating, but it needs to be answered within the given 30 days with a specific formatted letter. We can strategically respond and initiate the proper workers compensation policy to successfully and effectively represent your business.

As a workers' comp consultant, Karen has personally assisted hundreds of clients with this daunting process. Working with a licensed Insurance Agent & Broker with 19 years of experience will ensure that your business properly navigates the state workers' compensation guidelines. Let us represent your workers compensation non-compliance, and we will protect your profits.
