Letter of Testimony

To Whom It May Concern,

After more than two years of continuous use, I can confidently say that MValve is one of the most innovative and reliable solutions ever introduced for air conditioning condensate drain systems.

Having spent decades in the hotel industry, I have seen firsthand the many challenges associated with traditional U-traps and their constant maintenance needs. These issues were long considered an unavoidable part of operations, until I discovered **MValve**.

Since installation, systems equipped with MValve have consistently provided reliable performance, demonstrating solid dependability and efficiency in real-world conditions. The improvement in overall system performance has been clear and consistent.

Based on our experience, it offers lasting performance, dependable operation, and complete peace of mind for the operations.

Sincerely,

Elie Tohme
General Manager
Regency Luxury Suites, Dubai Marina
