

Paint Your Own Pottery Tips and Tricks:

- Use a pencil to draw out a design before painting it. The graphite will burn off in the kiln.
- Use a clean brush to dip directly into a paint jug. Or use the paint on the inside of the lid.
- Clean brushes with water and dry them before going into the next color.
- Dark paint can go over light, light paint cannot go over dark.
- No more than 2-3 layers of paint. No more than 1-2 when using black.
- Any unpainted portions of your piece will have the natural coloring of the ceramic.
- Have fun!!!
