

FOR VETERANS WITH HAND TREMORS

Your Path to GyroGlove™

Recovery Health Tech guides you and your VA care team through screening, evaluation and the approval process.

POTENTIAL NO-COST VA ACCESS If you are an eligible VA patient and GyroGlove is prescribed and approved through the VA, there is no cost to you. Coverage and approval are determined by the VA.

The three-step process

1

Start with Recovery Health Tech

Tell us how your tremor affects everyday life.

Complete the RHT screening form online or contact our team.

Share your VA clinic, neurologist or occupational therapist and the activities most affected by tremor.

RHT helps identify the appropriate next step and coordinates with your care team.

2

Complete a hands-on evaluation

See whether GyroGlove provides meaningful improvement for you.

A neurologist or occupational therapist evaluates tasks with and without GyroGlove.

Examples may include writing, eating, drinking, grooming, dressing or using a phone.

Results vary; the evaluation helps you and your clinician decide whether the device is appropriate.

3

Clinician recommendation and VA approval

If the evaluation is successful, your clinician initiates the VA process.

The VA clinician documents medical need and submits the prescription/order through the appropriate VA channel.

The VA reviews eligibility and authorization. RHT assists with coordination and requested documentation.

After approval and delivery, RHT provides setup guidance and ongoing product support.

VETERAN'S GYROGLOVE WORKSHEET

Bring this page to your neurologist, occupational therapist or other VA-authorized clinician.

My information

Veteran's name	
Phone / email	
VA medical center or clinic	
Neurologist / occupational therapist	
Next appointment date	

How tremor affects my daily life

- ☐ Eating or drinking
- ☐ Writing or signing my name
- ☐ Dressing, buttons or zippers
- ☐ Grooming or personal care
- ☐ Using a phone, tablet or computer
- ☐ Cooking or household activities
- ☐ Hobbies, work or social activities

THE ACTIVITIES I MOST WANT TO IMPROVE

1	
2	
3	

What to discuss with my clinician

- ☐ Would a GyroGlove evaluation be appropriate for my type and severity of hand tremor?
- ☐ Can we compare the same everyday tasks with and without the device?
- ☐ Does the evaluation show meaningful functional improvement for me?
- ☐ If recommended, can you document medical necessity and initiate the VA prescription/order process?
- ☐ Who will coordinate with Prosthetics or the appropriate purchasing department?

VA COORDINATION & PROCESS STATUS

Use this page to record the contacts, approvals and follow-up needed to complete the process.

My VA coordination contacts

VA clinician / therapist	
Clinic phone / secure message	
Prosthetics / purchasing contact	
WHERE YOU MAY BE EVALUATED The process can generally be coordinated through a VA medical center, community-based outpatient clinic, satellite clinic or VA-authorized community care neurologist or occupational therapist. RHT currently works with clinics and clinicians throughout Louisiana, Tennessee, Arkansas, Mississippi and southern Alabama.	

Process status
