

NA Native American Studies Center

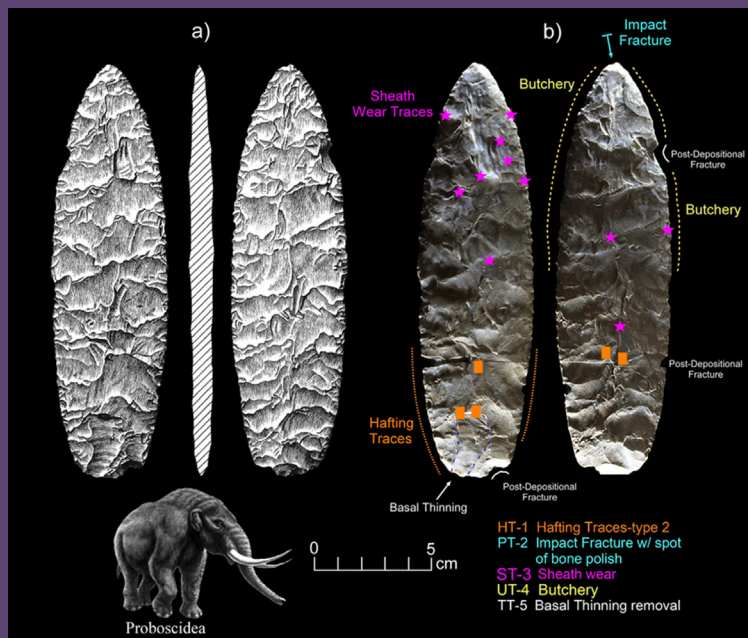

UNIVERSITY OF SOUTH CAROLINA LANCASTER

W. Brent Burgin Lunch and Learn Lecture Series 2024

Blood Residue Analysis of Paleoamerican Stone Tools in the Carolinas

**Friday, April 26
2024
Noon**

**Dr. Christopher Moore, University of South Carolina
Institute of Archaeology and Anthropology**

One of Moore's major interests as an archaeologist has been to understand how the earliest Paleoamericans lived and interacted with megafauna species. Just how implicated should humans be in the extinction of these ice age animals? In a new study, Moore and his colleagues used a forensic technique more commonly used to identify blood on objects at crime scenes to investigate this question.

This program will be held virtually and in person at 119 South Main St. in downtown Lancaster. To attend via Zoom, scan the QR code or register via the link in upcoming events on nativeamericanstudies.org. Please direct any questions or comments to the Center at 803-313-7172 or usclnasp@mailbox.sc.edu.
