

SPINDLES TURRETS CNC SERVICES

We are German-certified (IHK-Abschluss) CNC repair specialists delivering precision spindle rebuilds, live-tool turret repairs, and actuator service - all under one roof. Our team combines German craftsmanship and engineering technology with fast North American turnaround to provide verified, long-lasting repairs that keep your machines running.

SPINDLE SERVICE TURRETS & ACTUATORS

Complete spindle rebuilds performed to OEM standards:

- Precision bearing replacement
- Shaft and taper repair
- Sealing upgrades and contamination control
- High-speed dynamic balancing
- Full testing in a clean-room environment

Result: restored accuracy, reliability, and extended service life.

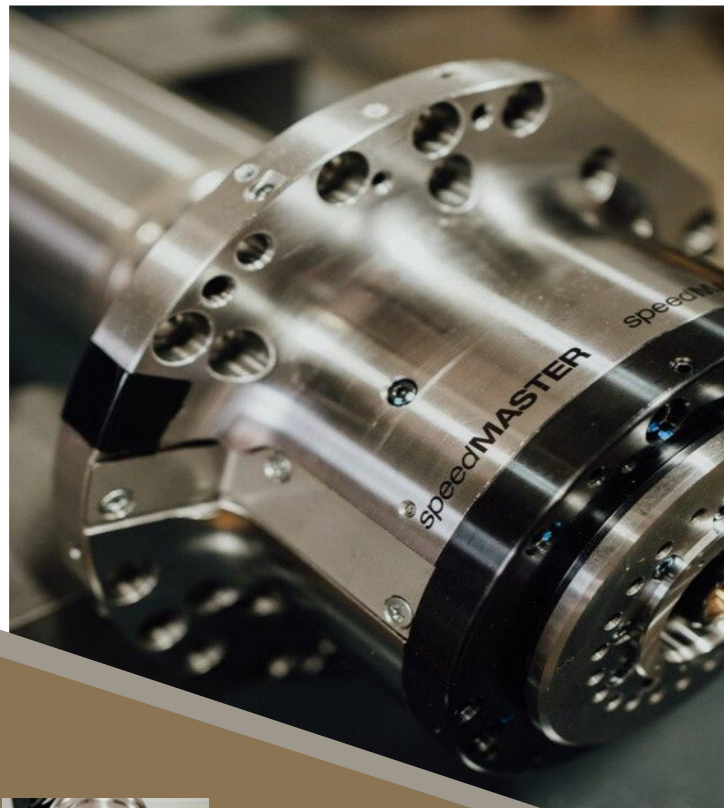

Beyond spindles, we keep machines production-ready with:

- Turret repair, indexing, and alignment for smooth operation
- Actuator rebuilds that restore consistent clamping force

One partner for spindles, turrets, and actuators - start to finish.

WHY CHOOSE US

- Fast turnaround without overseas delays
- OEM-level accuracy and testing
- Complete CNC service in one facility
