

GIBEREX™

“Stimulating Growth. Improving Performance.”

NEW SOLUTIONS

GURANTEED ANALYSIS

Gibberellic Acid (GA₃) 3.0%

GIBEREX™ is a concentrated liquid plant growth regulator formulated with %3 Gibberellic Acid (GA₃) to stimulate cell elongation, promote uniform growth, enhance flowering, and improve fruit development. GA₃ plays a critical role in regulating plant physiological processes including stem elongation, bud break, flowering initiation, fruit set, and size enhancement.

This liquid formulation ensures rapid absorption and uniform distribution within plant tissues. GIBEREX™ is widely used to improve crop uniformity, increase fruit size, enhance flowering response, and break dormancy under controlled application programs.
