GURANTEED ANALYSIS

Humic Acid 65.0–70.0%
Fulvic Acid 15.0%
Soluble Potash (K_2O) 12.0%

HUMIK™ is a premium, high-analysis humic and fulvic acid potassium powder designed to improve soil structure, nutrient availability, root development, and fertilizer efficiency. With up to %70 humic acid and %15 fulvic acid, HUMIKAL™ enhances cation exchange capacity (CEC), chelates nutrients, and stimulates biological activity in the soil.

Potassium supports plant strength, water regulation, and carbohydrate movement, while fulvic acid improves nutrient mobility and uptake at the root and foliar level. HUMIKAL™ is ideal for soil application, fertigation, and tank mixing with fertilizers to improve overall crop performance.
