GURANTEED ANALYSIS

Cytokinins (as 6-Benzyladenine / 6-BA) 3.0%

Cytokinins (as Kinetin) 0.20%

CYTOFORCE™ is a high-potency liquid cytokinin fertilizer and plant growth activator formulated to stimulate cell division, lateral branching, delayed senescence, and improved sink strength. This advanced formulation combines two powerful cytokinins-Benzyladenine (-6BA) and Kinetin to regulate plant hormonal balance and maximize growth efficiency.

Clytokinins promote cell division, enhance chlorophyll retention, and improve nutrient mobilization toward developing tissues such as fruits, flowers, and new shoots. CYTOFORCE™ supports improved fruit set, uniform growth, increased branching, and enhanced yield potential.
