Maximized Space & Light

Unlike bulky traditional staircases, floating metal stairs create an illusion of more space by eliminating heavy supports. They allow natural light to flow through, making your home or business feel brighter and more expansive.

Switchback staircase with vertical baluster wall, and walnut treads

U-Shape staircase with cable railing, and red oak treads

Sleek & Modern Design

Metal floating staircases add a sleek, open-concept aesthetic that enhances any space. Their clean lines and seamless design create a modern, sophisticated look that blends effortlessly with various architectural styles.

Exceptional Durability

Crafted from high-quality steel, our floating staircases are built to withstand the test of time. Resistant to wear, moisture, and pests, metal stairs offer superior longevity compared to wood or other materials.
