!!! Important !!!

- This device is switching using 12VDC 24VDC being applied to the required input.
- It is **strongly recommended** to keep this side **ALWAYS facing down** to prevent water infiltration.
 - **ALWAYS** make certain the enclosure is properly grounded.
- Do not climb tower unless you are properly trained and follow proper safety protocols.
 - Do not use if lightning is possible.
- Always make certain proper lightning protections are installed on both your coax and control lines.
 - Always make certain your coaxes and control connectors are properly protected against water infiltration.
