

## **CONCRETE FINISHER**

Want to work for a company that's not so big you're lost in the crowd, has benefits, AND room for you to climb the ladder? We are a small family owned and operated business seeking a finisher to join our concrete crew. Projects will be primarily residential flatwork such as driveways, patios, and walkways, although some foundation and commercial work is a part of our services. Strong, organization, communication, and customer service skills are a must.

### **JOB PREREQUISITES**

Qualified applicants must have a minimum of one year of hands-on concrete work experience including:

- Site preparation including drainage, grading, shooting elevations, and base preparation
- Ability to install forms for flatwork
- Ability to place and tie steel reinforcement including rebar and wire mesh
- Ability to use Kumalong, edger, and jointer
- Ability to place concrete and execute broom and trowel finishes

Not required, but a plus:

- Knowledge of decorative concrete
- Ability to use straight edge
- Ability to form and finish walls and steps
- Ability to use skid steer or mini excavator
- Driver license and clean driving record
- Ability to pull a trailer with equipment
- Snow removal experience (plow and spreader)

Applicants must also meet the following requirements:

- Able to legally work in the United States.
- Be willing to assist with other types of construction when needed
- Be self-motivated, positive, and willing to perform multiple job tasks as needed
- Be able to show a professional demeanor on every jobsite
- Be able to take instruction and follow safety rules
- Be able to lift at least 80 pounds, bend, squat, and twist
- Be able to work outdoors in both hot and cold weather and varying weather conditions

### **JOB DUTY DESCRIPTION**

- Organize tools and materials needed to complete the project and assist with loading trucks and trailers.
- Greet client.
- Review project instructions with the foreman.
- Confirm layout, elevations, measurements and locations of all public and private utilities.
- Ensure that you have the proper safety equipment for the day's tasks. Review job specific safety procedures.
- Use hand and power tools.
- The finisher will perform excavation, grading, form installation and removal, placement of reinforcing steel, concrete pouring, concrete finishing including decorative techniques, application of curing compounds and pigmenting materials, job-site cleanup, and various other tasks related to installing concrete.
- Address any concerns that develop and confirm any changes with the foreman prior to execution.
- Make sure tools are clean and all items are neatly loaded onto the truck.

- Before leaving the jobsite, review completed work with the foreman, address any concerns, and, if needed, review the work plan for the following day with the foreman.
- On days when the weather is not conducive to construction, complete other maintenance tasks at the construction yard such as organizing tools and materials, maintaining equipment, etc.
- Attend staff meetings.
- Attend safety and educational seminars.
- Provide suggestions and collaborate to improve construction practices, safety procedures, and customer service.
- Other duties as specified by the project manager and foreman.
- Seasonal snow removal duties such as plowing and sanding (driver's license and clean driving record required to participate).

### **BENEFITS SUMMARY**

- End-of-year bonus
- Paid time off
- Retirement plan
- Health and dental benefits
- Sam's Club membership
