STAIN-CRETE

# New Life To Old Concrete Floors

*Transform plain concrete into surfaces rich in color*

**Stain-Crete** is not a paint cover up, but a reactive stain that penetrates concrete to restore and beautify existing concrete surfaces with distinctive, permanent color. The result is a marbled appearance with translucent highlights that does not chip, fade or peel. With multiple colors and creative design options available, an unlimited palette of possibilities is an affordable alternative to tile. Once sealed, Stain-Crete delivers a protected and low maintenance surface. With total flexibility and endless design freedom, Stain-Crete redefines elegance for venues such as restaurants, hotels, conference centers, dealerships and an array of commercial/retail locations.

■ **Stain-Crete** is ideal for any commercial or residential project needing to enhance any theme or decor with rich color. The resulting distinctive, beautifully marbled, translucent effect looks like natural stone. Stain-Crete can be used in conjunction with surfaces that have already been color hardened or integrally colored.

**Ideal for: Interior and Exterior Surfaces | Showrooms | Interior Floors**
