

# Tunnel Book Instructions

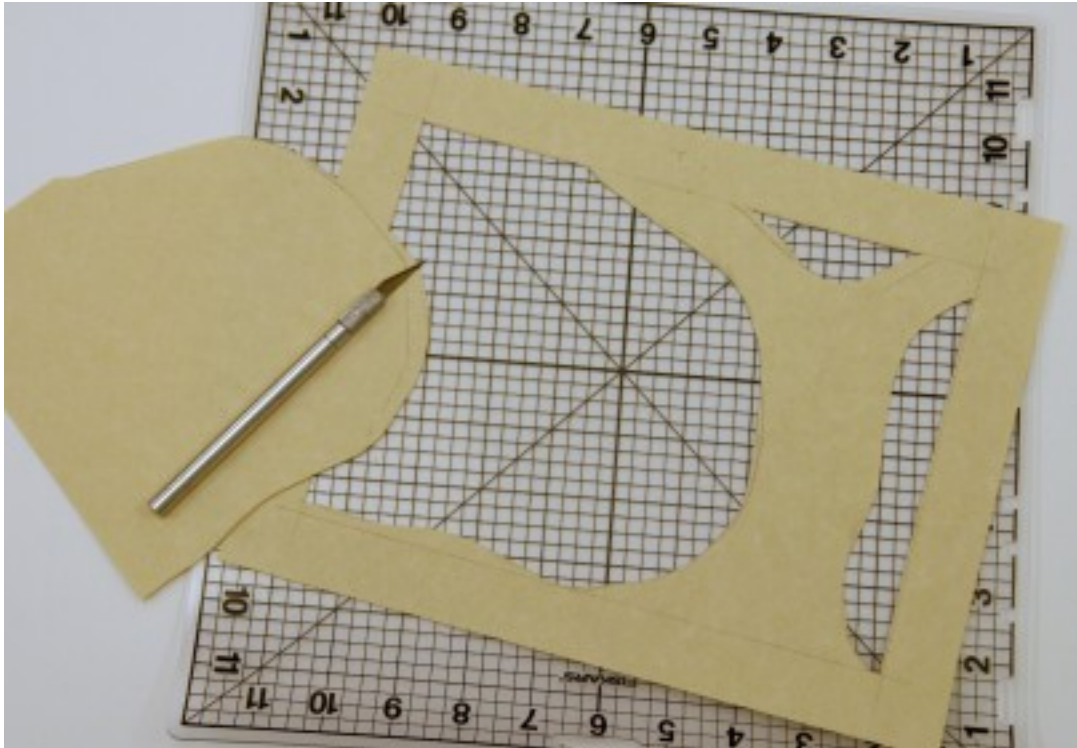

**Step 1:** Gather your supplies. To make a simple three-paged tunnel book, you will need three pieces of paper for the image, two pieces of paper for the spine, a pencil, a ruler, an exacto knife and/or a pair of scissors.

# Tunnel Book Instructions

**Step 2:** This was the hardest step, deciding on a drawing or picture with either defined perspective or many objects clearly defined. Since my drawing skills are slightly lacking... I created a simple forest landscape.

# Tunnel Book Instructions

**Step 3:** After you have the drawing on each page, cut them out.

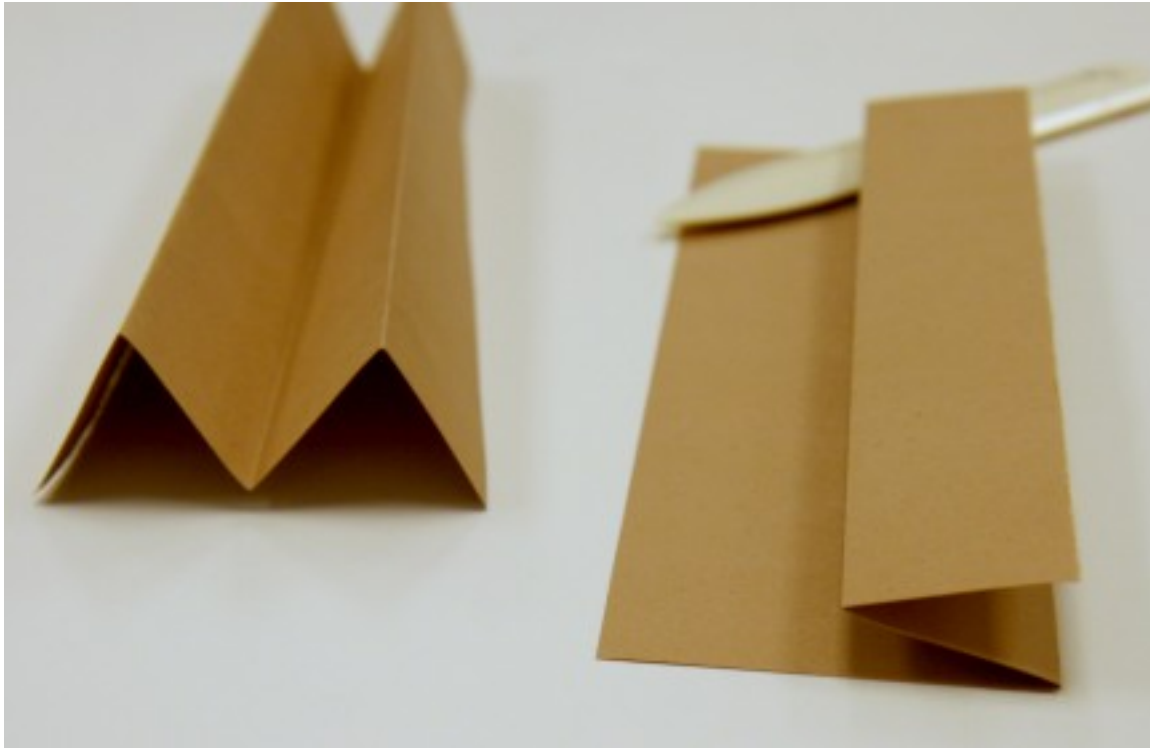

# Tunnel Book Instructions

**Step 4:** Time to make the spines. Take a sheet of paper and fold it in half.

**Step 5:** Cut the folded sheet in half, making two smaller strips of paper. Repeat step 4 and 5 with the second sheet of paper. You now have four strips of paper.

# Tunnel Book Instructions

**Step 6:** Take each of these four strips and make four M-shaped accordions. To make an M-shaped accordion, fold the strips in half lengthwise; then fold the edges back to the center fold.

# Tunnel Book Instructions

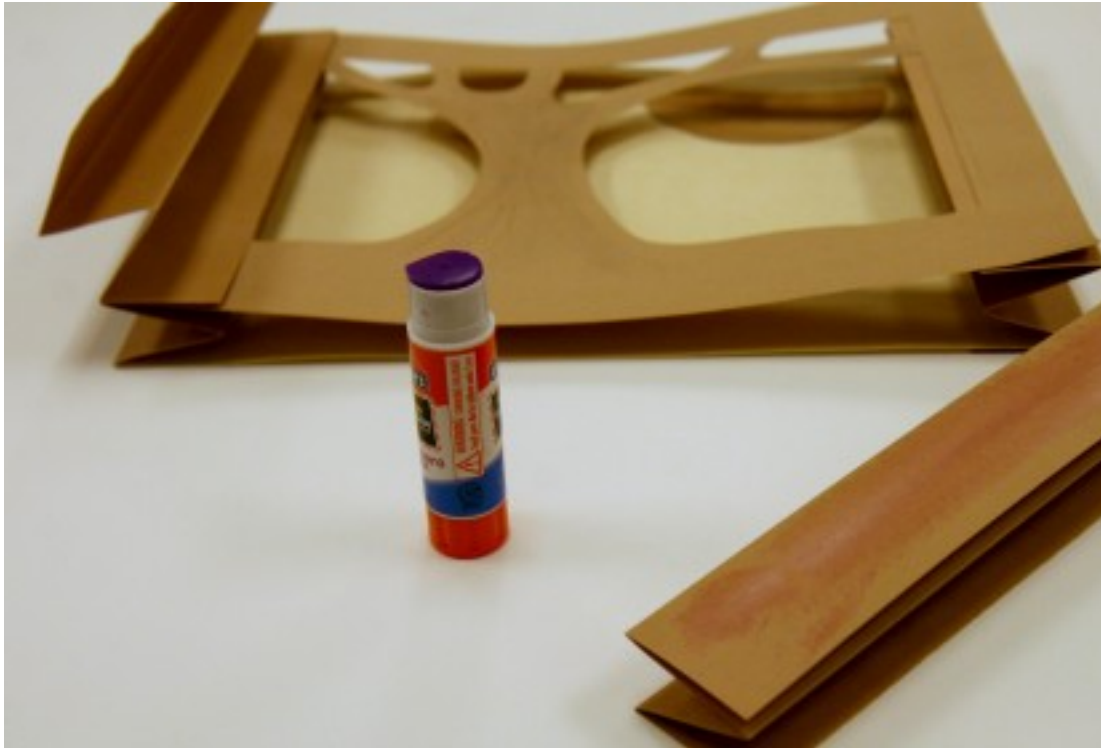

**Step 7:** Now we are ready to assemble the tunnel book.

# Tunnel Book Instructions

**Step 8:** Place the back page on top of two of the M-shaped accordions, one on each side. Make sure that the creases are on the outsides, and glue the page to the back of the accordion (see photo for Step 9).

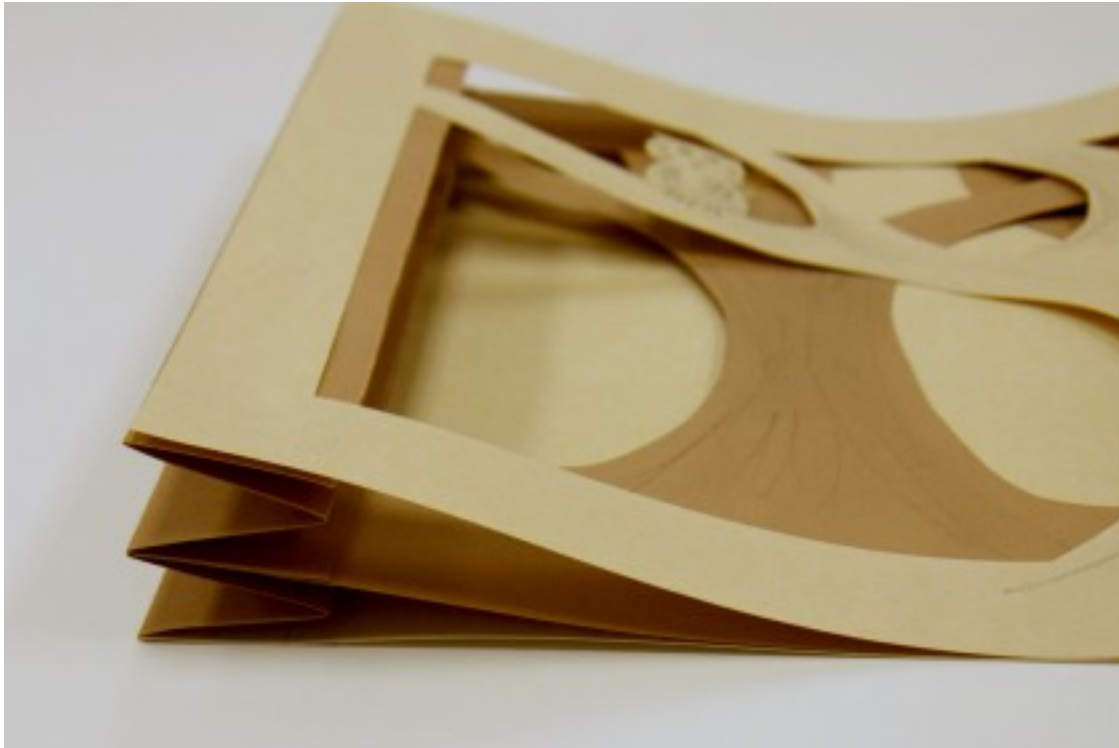

# Tunnel Book Instructions

**Step 9:** Glue the next page to the top of the first M-shaped accordion. Next, attach the second M-shaped accordion pieces, one on each side. (You're sandwiching the middle page between the two M-shaped accordion folded pieces on each side.)

# Tunnel Book Instructions

**Step 10:** Glue the front page of your book to the top of the M-shaped accordion strips at either side, and let the glue dry.

# Tunnel Book Instructions

**Step 11:** You have just made a tunnel book!

Now you try! You can make longer books by adding pages and making more M-shaped strips.
