

EnviroPam L

EnviroPam L is a safe, non-toxic linear anionic polymer that binds hydroseeding media to the soil particles, helps maintain soil structure and reduces soil erosion. EnviroPam L retains moisture creating a better seed germination environment and establishment. It will not clog in the tank, clogging the spray nozzle. EnviroPam L lubricates the slurry mix and tightens the slurry stream and will increase shooting distance. EnviroPam L can be used as a temporary dust abatement and as a temporary soil stabilizer to protect against erosion. It can be applied through hydraulic equipment for clarifying sediment/holding ponds.

EnviroPam L meets ANSI/NSF Standard 60 drinking water requirements. EnviroPam L is compatible with biostimulants, fertilizers and surfactants.

Benefits and Features:

- Economical and easy to apply
- Reduces erosion
- Provides for better seed germination environment
- Bonds hydroseeding matrix to soil particles
- Dust Control
- Flocculant
- Improves soil by increasing soil porosity and water infiltration
- Compatible with other hydroseeding amendments

Uses:

- Construction Sites
- Mine Tailings
- Refuse Sites
- Reforestation and Revegetation
- Landfill Cappings

Application Rates:

Slope:	Flat to 3:1	2:1	1:1
Gallons/Acre	1	2	3

Packaging:

5 gallon pails/36 pails per pallet

Product Characteristics:

Chemical:	Anionic linear copolymer of acrylamide
Appearance:	Opague liquid
Molecular weight:	High
Maximum Concentration:	5g/l
Viscosity:	2500

Data on application rates is provided for information purposes only. Application rates may vary according to soil conditions, and slope.
