

MATERIAL SAFETY DATA SHEET
HydraFiber

- 1 **PRODUCT IDENTIFICATION:** Polyester is a family of fiber products having similar hazard and physical property characteristics. These products are made from polyethylene terephthalate polymer and one or more surface finishes.
- 2 **HEALTH HAZARD DATA:** Non Toxic. This product is not listed by OSHA, NTP, or IARC as a carcinogen.
- 3 **REACTIVITY DATA:** There are no known physical or health hazards associated with this product, as defined in the code of Federal Regulations, Title 29, Part 1910, 1200.

The polymer immobilizes the constituents of the polymer system (delusterants, catalyst residues, etc.) which, therefore, presents no likelihood of exposure under normal conditions of processing and handling.

However, exposure to chemical substances may occur as a result of processing these fibers. Processing may release and aerosolize the residual moisture and surface finishes. Heating the fibers may volatilize the finishes or produce a chemical change.

- 4 **PHYSICAL CHEMICAL DATA:** Polyethylene terephthalate is chemically resistant to attacks by oils, solvents, weak acids, and weak alkalis.
- 5 **FIRE and EXPLOSION:** Polyester will burn if exposed to flame. Decomposition products generated from molten polymer may be subject to auto ignition. Combustion products will be comprised of carbon, hydrogen, and oxygen. The exact composition will depend on the conditions of combustion.
- 6 **SPILL, LEAK, and DISPOSAL:** These products are not classified as hazardous waste under the Resource Conservation and Recovery Act and, unless prohibited by state or local regulation, can be disposed of in a municipal landfill or incinerated. These fibers are not classified by the Department of Transportation as a hazardous material.
