CHECK SECURITY FEATURES EXPLAINED

WARNING BOX
Area on the check back that lists the security features included for quick verification.

VOID PANTOGRAPH
Displays when checks are photocopied or scanned on most machines.

MICROPRINTING
Text is printed at 1/100 inch so it appears as a line, but can be verified with a magnifying glass. If scanned or photocopied, the line will look solid.

ARTIFICIAL WATERMARK
A watermark image is printed on the paper and is visible when viewed at an angle.

TRUE WATERMARK
A true watermark is placed in the paper fibers at the time the paper is manufactured. View by holding up to a light source.

FLUORESCENT FIBERS
Fibers embedded in the sheet are visible only under ultraviolet light.

CHEMICAL PROTECTION
Chemicals in the paper react when bleach or other solvents are used to change the check.

PRISMATIC PANTOGRAPH
Checks are printed with graduated colors which are the most difficult types of checks to photocopy or scan.

THERMOCHROMATIC INK
Heat sensitive ink block will fade and reappear when held between thumb and finger or breathed on.

ERASURE PROTECTION
A protective treatment is applied during manufacturing. Attempts to alter check information by erasure produces a white mark in the background pattern.

PADLOCK ICON
Alerts to security features listed on the back.

ORIGINAL DOCUMENT BACKER
Light grey printing on the back disappears when photocopied.

TONER ADHESION
Causes toner to bond permanently to paper. Attempts to remove information causes paper to tear.

COIN REACTIVE
Invisible layer on back of check changes color when rubbed with a coin.

Efficiently Process a Large Volume of Checks with Pressure Seal

PRESSURE SEAL CHECKS

Print checks on special blank security stock that has glue along the edges. Then, fold and seal the check with pressure seal equipment for easy mailing. Pressure seal checks are best for a large volume of checks for multiple accounts. It is critical to ensure compatibility with your accounting software (so data prints in the right locations), and pressure seal equipment (so the glue pattern aligns for proper sealing). **Request free samples!**
Minimum quantity 500.
