

To our valued customers,

Green Machine Services was created in 2022 to provide you with a focused service / support organization that could assist you with the repair and maintenance of your Sennebogen Material Handlers. We hope that you have found the team up to your expectations and we look forward to continuing as a valued business partner. Moving into 2025, we would like to share news of an evolution that is in process.

Tyler Equipment Corp. is a 103-year-old equipment dealership with locations in Connecticut and Massachusetts. Through the years, we have represented a number of well-known manufacturers and in 1954, we aligned with The Michigan Power Shovel Company which has evolved into what is today, Volvo Construction Equipment. Tyler's first serious entry into the recycling industry came when Volvo acquired Akerman, Inc and we purchased their factory store in CT. Then, in 2004, in order to offer a more focused product range, we became a Sennebogen dealer. Because of our strong relationship with them, we collaborated and formed Green Machine Services to provide top quality product support to a broader range of Sennebogen customers. At this time, we have reached a point where the unification of GMS and Tyler will be the steppingstone into the future.

Our goal is to scale up and provide you with a strengthened support organization and to that end, we have recently added two more skilled technicians as well as a salesman. The next stage, which is the planning phase, will be a facility.

Up to this point, we have been using (732) 673-5920 as our primary contact number. With this unification of organizations, this will no longer be a Tyler Equipment number. We are shifting the point of contact to a new number that will allow us to direct you to our service team or to our parts and sales departments. That new number will be (732) 359-5055.

As we move through the transition, we will be adding your customer information to Tyler's records, and we will notify you when we reach a cutoff date for Green Machine Services.

This is an exciting transition, and it is the next step in a plan for continuous improvement that we will provide the best possible support for your machinery. By combining the organizations, we will bring you a seasoned dealership that will ensure that Sennebogen and Tyler are the right choice.
