

The Strittmatter Center for Wellness

You are scheduled for your annual Medicare Preventative Services evaluation today.

This is a yearly service provided by Medicare that is 100% covered without co-pay or deductible. At this appointment we review the preventative services Medicare offers and provide you with a plan to schedule testing as needed.

Please be advised this evaluation does NOT include a physical exam or review of labs or management of chronic medical conditions or acute/ new issues.

We can (and often do) address several issues in the course of one visit in order to save you time, but these other issues will be billed as an office visit which IS subject to a copay or deductible.

I have read and understand this information.
