

# ABCO DEOX 710

ABCO Products of Sacramento

## Primary Usage

Deox 710 is an effective deoxidizer/desmutter for use in your aluminum processing line.

## Application

Normal working concentrations are 8 -12 ounces per gallon of water. Temperature ambient to 110°F. Time depends on material and smut to be removed.

## Equipment

PVC polypro or polyethylene lined tanks.

## Chemical Composition

Sodium Nitrate

## Performance Data

Agitation- use of air increases effectiveness and prolongs bath life.

## Analytical Procedure

1. Pipette a 10.0 mL sample into a 250 mL beaker
2. Dilute with distilled water to about 60-75 mL
3. Using a Ph meter, titrate to a pH value of 4.0 with 0.1 N Sodium Hydroxide
4. Calculations: Oz/gal Deox 710= (mL 0.1 N NaOH) (N) (2.105)

**Caution: Avoid breathing dust and mists, use protective equipment when handling.**
