

ABCO PCS

ABCO Products of Sacramento

Primary Usage

ABCO PCS is a surface stripping formulation for the Powder Coating Industry, which provides a high degree of efficiency without sacrificing safety and protection of the environment.

Application

ABCO PCS is used concentrated.

1. Temperature 130°F – 150°F (do not exceed 150°F)
2. Time Varies, depending on thickness and type of coating.
3. Agitation Mechanical agitation is recommended
4. Keep covered at all times to avoid evaporation.

Chemical Composition

Ethanolamine

Performance Data

This product is designed to perform on polyurethane's, epoxies, polyamides and a variety of surface coatings, without harming the base aluminum, titanium, stainless steel, and high-strength steels.

Floating seal high-flash mineral oil based minimizes drag out, odor and evaporation.

Equipment, Tanks and Heaters - Steel or stainless steel.

Caution: Wear protective equipment when handling
