

ABCO Silicon Defoamer

[ABCO Products of Sacramento](#)

Primary Usage

ABCO Silicon Defoamer is for defoaming different mixtures of solutions used in the chemical treatment area.

Application

ABCO Silicon Defoamer can be used at different dilutions with water, depending on the defoaming speed required. The three applications used for defoaming are drip, pumping or pouring methods and will produce good results. Avoid creating mist or aerosol. Maintain good housekeeping practices.

Performance Data

ABCO Silicon Defoamer should not be used around plating solution. It can cause adhesion problems that will be difficult to eliminate.

Disposal

Use local requirements by the local environmental agency in charge of disposal

Caution: Wear protective equipment when handling.
