

# OUR MISSION

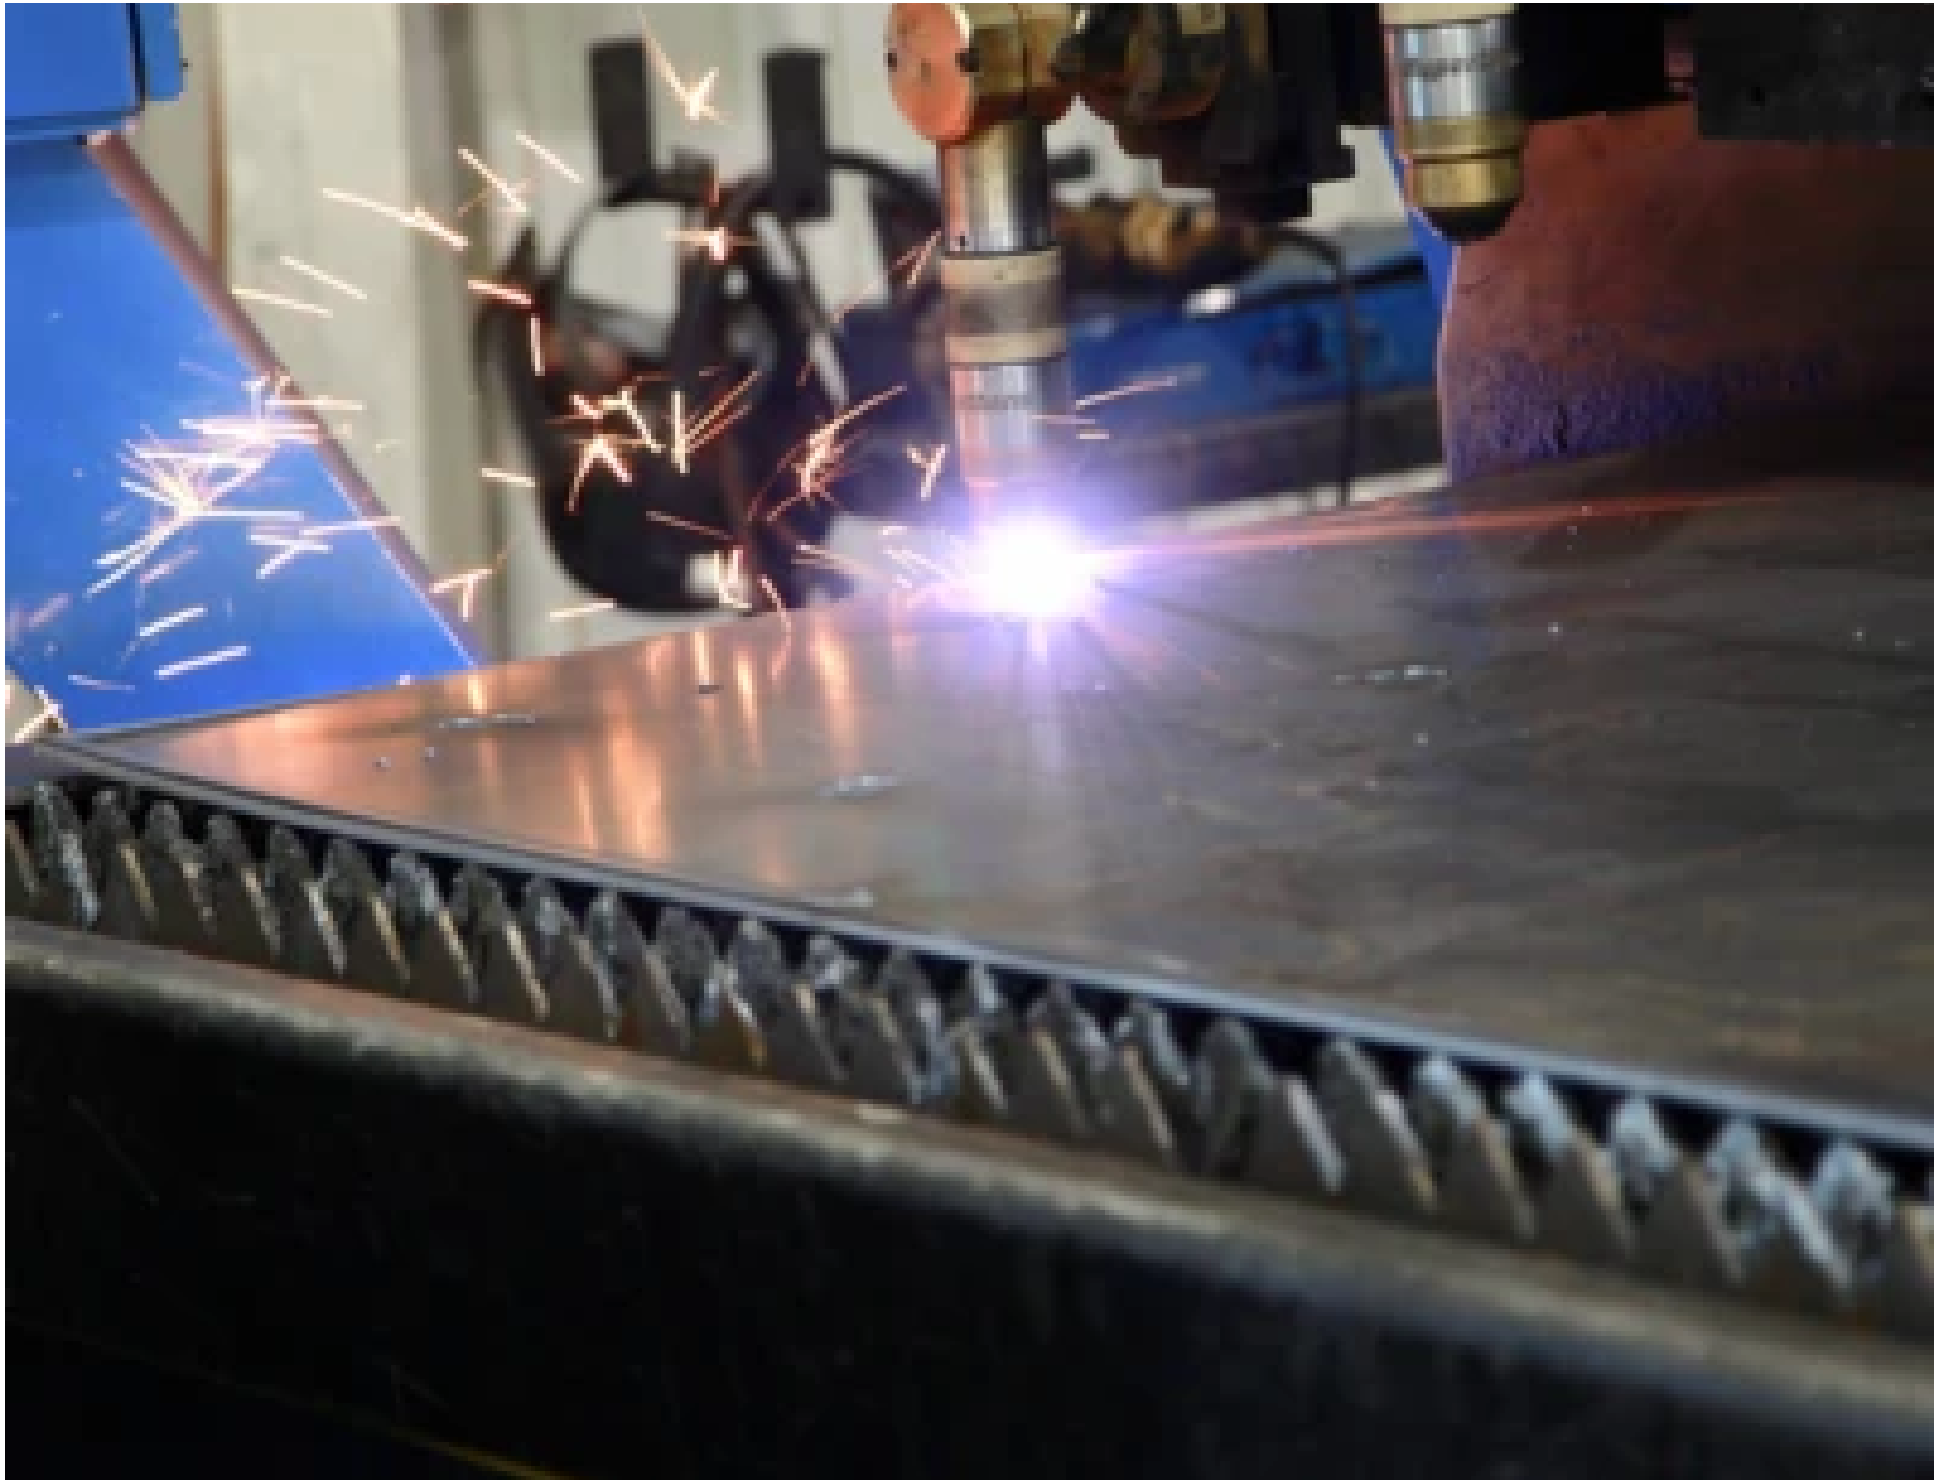

## SUPERIOR QUALITY

Chandler is a family-owned manufacturing company located in the center of the United States. We specialize in innovating, engineering and manufacturing superior-quality truck accessories. We have long provided long-lasting products and components for heavy-duty industrial jobs for almost 40-years. We bring that same durability to our truck accessories.

We strive to always be the highest in customer satisfaction, by producing products that last a lifetime.

## DESIGNED BETTER

There is no other truck box on the market more carefully designed than a Chandler Truck Box. A tour of the Chandler facility reveals the amount of careful consideration and planning that went into developing these structures and the technology and machinery to create them.

The quality is surprising; because regular standards aren't just met ... they're surpassed. That's why Chandler Truck Boxes are better than expected and exceed expectations every time.

## THE CHANDLER DIFFERENCE

All of our products are robotically welded under the watchful eye of a Chandler employee. We use only the best materials - such as 12 gauge carbon steel or 3003-H22 .124" Diamond Tread Plate.

Our products feature the toughest hinges in the business - heavy duty aluminum, greasable custom hinges, and greasable dual custom hinges. Powder coat finish (unless diamond plated or no-grip tread product).

Custom sizes available on request.
