

RADIONICS IN BRIEF

Radionics is a distant healing technique in which our natural intuitive faculties are used through dowsing to discover the energetic disturbances underlying illness and to encourage the return to health.

As well as a physical body man is considered to have etheric, emotional, mental and spiritual dimensions, known as the subtle bodies. These are the focus for radionic analysis.

WHAT IS INVOLVED?

The practitioner will need a completed case history form and a small snippet of hair to carry out the analysis.

Using dowsing skills, a trained practitioner can identify imbalances, not only in the subtle bodies and energy centres, but also in the physical body. Underlying causes are determined and then treatment begins.

The effects of treatment may be felt quite rapidly with an increased sense of wellbeing preceding improvement in physical symptoms. In the case of chronic conditions a longer time may be needed.

It is important to keep in regular contact with your practitioner once your treatment has commenced as this is found to strengthen the healing link.

TREATMENT

Treatment can be transmitted to humans, animals, plants and the soil anywhere in the world.

Radionics may be used alongside other therapies and to support conventional medicine.

Treatments to rebalance energies and support the body's systems are transmitted by the practitioner, often using a radionic instrument as a tool to focus the healing energy.

Radionics can project the vibrational patterns of homeopathic remedies, flower remedies, colour or crystals.

Requests for radionics often come from people with the following problems:

- allergies
- muscular and skeletal damage
- sleep problems
- stress during exams, moving house and other life traumas
- for support through serious illnesses and when undergoing surgery

Other requests come from:

- the horse world, where the 'black box' is well known, for behavioural problems, for racing and eventing performance
- dog and cat owners
- those working in agriculture and with livestock

WHAT ARE PEOPLE SAYING ABOUT RADIONICS?

'Thank you for your lovely help always, I am so grateful that I was led to you and radionics'

'This kind of healing is the medicine of the future'

'Radionics has underpinned the deep changes that I have striven to make at all levels'

'Radionics can bring immediate relief to physical symptoms and also be the most helpful guide and support to self development.'

'My practitioner is like a first-aid kit. My family and I are always getting into scrapes and radionics saves the day.'

'We used radionics to protect us against 'flu and have not been afflicted since'

'I use radionics when competing my horse to keep him calm in the dressage and confident cross country'

'There have been changes in her, on approaching other dogs she is much calmer and I feel much more positive about her and looking forward to training her'

THE RADIONIC ASSOCIATION

The Radionic Association was established in 1943 as the leading worldwide professional body representing qualified practitioners, providing training courses and information on radionics for potential patients, students and complementary healthcare professionals.

Associate Membership is available to those who wish to learn more about radionics, support the Association and keep up to date with its activities. Professional Membership is offered to those who successfully complete the professional training programme – see below. All Members receive the Radionic Journal and news of meetings and other events.

COURSES AVAILABLE

The **Introduction to Radionics Day** covers the basics of radionics and can lead on to the Professional Course.

The **Professional Course** is a three year part-time course leading to a **Diploma** from the School of Radionics.

Dowsing Day. Held in preparation for the Introduction to Radionics Day.

A **Soil & Crops Course** is planned for the near future. Please apply to the office for further information.

Post Graduate courses. We offer courses in the treatment of Small Animals and Horses.

Please visit the website www.radionic.co.uk or contact the office for more information
