

## Fireplaces

The Fireplace, traditionally the focal point of a room, is usually treated in a highly decorative fashion. ArcusStonecoat is very effective at creating a dramatic design statement when used for mantle and fireplace surrounds.

The above photograph shows several combinations for a fireplace surround, from simple to elaborate, utilizing field applied ArcusStone finishes, custom carvings and precast ArcusStone shapes. Designers are encouraged to use the designs as inspiration for creating custom styles.

Also, since ArcusStonecoat is a non-combustible material, safety requirements are met. Please check local building codes for approved use of products.

The following information must be indicated on drawings to properly specify the products and allow the applicator to do accurate cost estimating:

1. Fireplace Surround Style ( as shown on above drawing ).
2. Size of the firebox opening, dimensions of the hearth and the mantel.
3. Stone Coursing Pattern, if any.
4. Stone Texture.
5. Stone Color.
6. Selection of cast stone molding styles, applique style, custom carving, etc.
