Floors

Field applied ArcusStonecoat over existing tile floor

ArcusStonecoat tiles

Floors can be field applied over a stable substrate or installed as tiles.

The drawings that follow show a variety of traditional coursing pattern and decorative mosaic styles. ArcusStone applicators can recreate simple to complex designs with field-applied ArcusStonecoat or tiles. Designers are encouraged to choose a style appropriate for their project or to use the designs as inspiration for creating custom styles.

The style drawings may be used as guides, but the designer should indicate stone layouts and typical sizes on their elevations if possible.

The following information must be indicated on drawings to properly specify the products and allow the applicator to do accurate cost estimating:

1. Style of floor treatment (as shown on following pages, or custom style).
2. Location and extent of floor treatment.
3. Stone Texture.
4. Stone Color.
