

— LIGHTS. CAMERA. YOU.

MAKE A REAL MOVIE IN 5 DAYS

The Thomasville Film Lab. Five days. One real short film, made alongside professional filmmakers.

This isn't a class where you watch from the back row. You'll step onto a working film set and join the crew that writes, shoots, and produces an actual short film, learning side by side with experienced filmmakers who do this for a living.

No experience needed. They'll coach you through the real jobs that make a movie happen, camera, directing, sound, lighting, editing, and help you find the one that's yours.

And when the credits roll? Your film gets submitted to festivals and screened at a live public premiere. **Your name. The big screen. The real thing.**

WHO

High school students in Thomasville

EXPERIENCE

None required, just show up ready

WHAT YOU MAKE

A festival-bound short film with a public premiere
