CONTRACT MANUFACTURING SERVICES

L&B Labs boasts two decades in Silicon Valley of unparalleled expertise as a premier contract manufacturing firm, historically serving the technology, semiconductor, and laser industries. This experience enables us to accommodate even the most complex technical needs with precision and efficiency. Our team's cohesion and longevity are exceptional, with many staff members collaborating successfully for decades. This stability ensures continuity and consistency in our operations, earning us the trust of leading companies in the technology manufacturing sector. At L&B Labs, our legacy of excellence and dedication to meeting and exceeding client expectations make us the preferred choice for those seeking reliability, precision, and innovation in contract manufacturing solutions.

CORE COMPETENCIES

- Computer-controlled manufacturing; up to 5-axis
- Materials: stainless steel, aluminum, carbon steel, copper, Inconel, Invar, titanium, molybdenum, plastics, and other exotic metals
