### INTEGRATION OF 365 TOTAL PROTECTION IN THE EMAIL MANAGEMENT SYSTEM

All aspects of security administration are easy to manage with 365 Total Protection — without the need for maintenance or updates. Existing user profiles can be managed or created in mere seconds.

HORNETSECURITY

FACT SHEET

365 total Protection Business & Enterprise	Description
Email Live Tracking	Monitoring of all email traffic in real-time and definition of filtering and delivery options
Infomail Handling	Prevention of direct delivery of emails classified as newsletters and info mails
Content Control	Protection against the intrusion or sending of unauthorized file attachments according to company policy
Compliance Filter	Extended filter for automatic checking of email traffic according to self-defined filter rules
Spam and Malware Protection	Multi-level filtering systems and in-depth analysis for immediate detection and defense against new types of threats and attacks
Outlook Deny & Allow listing	Interface for central control from Outlook
Individual User Signatures	Central control over company-wide uniform email signatures; automatic matching of contact data records through integration of Active Directory
1-Click Intelligent Ads	Setup of automatically integrated advertising banners or links in the email signature for external corporate communication; group-based assignment possible
Company Disclaimer	Automatic integration of uniform and legally compliant company disclaimers in every outgoing email; group-based assignment possible
Global S/MIME & PGP Encryption	Strong encryption solution to secure email communication against unauthorized modification or access by third parties; protection of internal company and sensitive contents against spying
Secure Cipher Policy Control	Central TrustChain management; individual definition of security criteria used for email communication
Websafe	Securing confidential email communication with communication partners who do not use encryption technology
Single Sign On	Secure and simple authentication with Single Sign On within Microsoft. All users with a valid license of Microsoft 365 can easily authenticate with their user data in Hornetsecurity's product, without having to maintain additional separate login data.
365 Total Protection Enterprise	Description
Email Archiving	Automated, legally compliant and audit-proof email archiving immediately upon receipt and dispatch of emails
10-Year Email Retention	Simple and legally compliant access to archive data within the framework of legal retention periods
eDiscovery	Advanced email full-text search with numerous filter functions for precise location of searched data in seconds
Forensic Analyses	Forensic analysis mechanisms, algorithms and AI-based detection mechanisms for effective defense against sophisticated threats
Secure Links	Secure Links protects users from malicious links in emails. It replaces original links with a rewritten version that goes through Hornetsecurity's secure web gateway. The click on a link initiates a deep web scan that scans the target site for malicious web resources.
ATP Sandboxing	Protection against targeted and blended attacks through dynamic analyses
URL Malware Control	Securing of all Internet calls from email communication; analysis and securing of downloads
QR Code Analyzer	Protects from malicious QR codes embedded in images. Detects QR codes at light speed and can analyze different types, including URLs and texts.
Realtime Threat Report	Overview of the Company Security Management; collection of comprehensive information (threat reporting, attempted attacks including attack type and vector) at a glance
Malware Ex Post Alert	Notification of emails subsequently classified as harmful including detailed evaluation
Email Continuity Service	Effective protection against system failures with automatic immediate activation
Malware Ex Post Deletion	If emails that have already been delivered are identified as potentially malicious in the course of lower-level AI-based analyses, Ex Post Deletion enables authorized security officers and administrators to initiate an immediate protective measure.
