- Available in weight capacities of 350, 450 and 600 lb.
- Available with or without scale.
- 2-Year Warranty.
- [Manufactured in the USA](#) for over 25 years.
- Battery Pack with Built-In Charger included.
- Medicare Stand Belt compatible.

The battery-operated transfer device that's safe, reliable and easy to use!

Reduces back injuries among nursing staff which cause lost workdays, worker's compensation claims, and liability insurance premiums.

Battery-powered lift can allow one nursing staff member to vertically lift residents weighing up to either 350, 450 or 600 pounds with minimal effort. Manual lowering device can be used in case of emergencies.

Tip-resistant, dual-purpose lift allows for standing pivot and seated position transfers and is easy to maneuver in tight places.

Height of knee pad can be adjusted. Slip-resistant footplate can be easily removed for cleaning.

Powder coat finish offers **years of chip-resistant, non-peeling wear**.

Magnetized hand-held pendant switch secures anywhere on the lift frame.

Optional wall-mounted battery charging station allows for 24-hour service.

Optional WeCare scale accurately weighs residents while they are lifted.

Complies with applicable federal and state regulations (i.e. OSHA).

Comfortable, durable back belts are easy to clean. The sitting position sling helps transfer residents who cannot bear weight.

Also available with electric expanding base!

Intellipack for **WeStand** and **WeLift**

WeCare Intellipack **option** for the **WeStand** and **WeLift** is a **high tech** option allows for data collection in the control box, work & cycle counter, service indicator, all displayed for instant viewing on control box LCD. The Service Data Tool Kit gives you the ability to read out service data on your laptop.

The Intellipack features a full LCD display on the control box that gives you the following information at a glance:

- How many full lifts the patient lift has done WITH a person/load on it. (This does not count a lift if the patient lift is empty)
- How many seconds your lift has ran with a person/load on it.
- If your lift has been overloaded beyond its weight capacity it will shut down momentarily and display the number of overloads.
- Count down of days until service is due. (This lets ALL staff know when the lift should have its maintenance inspection performed.)
- Battery level indicator on LCD display and on the hand control.

ALL of this information is available at a glance, keeping you and your staff informed of your lift performance.

WeLifts and WeLifts W/Scales are also Available in 450lb, 600lb and 1000lb Capacities.
