

4 WAYS TO CRAFT IMMERSIVE EDUCATIONAL MEDIA

RELATE

Establish Instructor presence and allow learners to feel connected to the instructor. Prompt students to reflect on their own experiences in relation to the topic and course.

NARRATE

Tap into the power of narrative to make learning stick. Share stories, anecdotes, or case studies that illustrate a concept and put learning in context.

DEMONSTRATE

Visually demonstrate step-by-step how learners will complete assignments or apply learning in the real world.

DEBATE

Important if you want to change the way learners think. Address misconceptions or present another point of view.
