

EMRL

SAFETY REMINDERS

1. ECIs required at all times when rifle is out of case. Chamber blocks with flags are NOT sufficient. ECI must insert into chamber itself, to ensure no round is inside.
2. DO NOT pick up brass around firing point until firing is completed and line is clear. You will be told when it is allowed that shooters may then pick up brass.
3. When firing, your muzzle MUST be forward of firing line, which is a painted **Red Line** on the front of the concrete pad. And remember, finger OFF the trigger unless on target.
4. All pets and children must be kept behind yellow safety line while match is in progress.
5. Cigarette smoking must be kept well behind platform while match is in progress.
6. Do not raise the muzzle above the target line *at any time!*
7. Be courteous to others and keep conversations behind yellow safety line and the noise level down. We all are trying to do our best.
8. Team captains or coaches will be responsible for the shooters on the line. We strongly recommend that a captain or coach stay with any new shooter on the line.
9. Team captains will be responsible for going over all the safety reminders and rules with all their team members.
10. Fun ***IS*** allowed!
