

## Our Process

- At Rebound Home and Community Therapy, our goal is always seeking to understand.
- Before we can offer advice and/or support, we must understand what has been happening that led you to our doorstep, and how you think we can best help you.
- In serving you and your family, we also recognize the need to collaborate with others who may also be working with you for support.
- This results in optimal communication strategies, care outcomes, and better team cohesion as we work towards similar goals across different environments (school, home, work, church, etc).
- Without this company wide mentality and approach, we would simply be “guessing” based on our own beliefs. Overtime, our clinical teams, clients, and families have proven this to be NOT as helpful as collaborating across the spectrum of supports to understand you and your needs.

- Physicians
- School Administration
- Pediatricians
- Special Education
- Clinical Psychologists
- Teachers
- Neuropsychologists
- Paraprofessionals
- Supports Coordinators
- And more!

## Frequently Asked Questions

### My child has received a diagnosis of Autism.

#### Now what do I do?

You are not alone. Many of our clients just call us and seek advice not knowing where to go or what to do. Give us a call and we can help figure out a go-forward plan for you and your family.

### How flexible is Rebound when scheduling services?

We aim to meet your needs and expectations. We will work to find staff who work best with your child/family and can also meet your scheduling needs.

### Does my child *really* need 30-40 hours a week of ABA?

We do not have a minimum number of required hours. Rather, treatment hours are based upon the need of the individual.

### How long do I have to wait to receive ABA/ Psychology services from Rebound?

We have a pool of approximately 3000 direct care workers across Michigan waiting to connect with you. Our goal is to never be the reason for a delay in service delivery for your child and family.

### What Insurance does Rebound accept, and do I have to pay out of pocket for any treatment?

We work with most major commercial insurance carriers including Medicaid. Out of pocket expenses may come occasionally in the form of a co-pay.

### My child is over the age of 21, how can I continue to receive behavioral health support?

We understand that care needs do not necessarily stop with your child's continued growth and development. Our psychological support services are here to connect one-on-one with your child and your family to best meet your needs.

### Where can I receive Rebound Behavioral Health Care?

Our services can be delivered in your home, school, community center, public setting, and/or our home-town office locations throughout the state.

We love meeting people where they live, work, and play in order to best optimize carryover during treatment thus optimizing progress.

### What are You Going Through?

Rebound Home and Community Therapy specializes in treating: Autism Spectrum Disorder, ADHD, Depression, Anxiety, BiPolar Disorder, OCD, Sensory Processing Disorder, and other Neurological and Psychological Conditions that cause challenges at work, home, or school.
