

"My love for the visual arts surfaced at a very early age, where I found myself expressing more easily through creating."

Gassia Mouradian

I chose Interior Design as my major in school, but since I volunteered in many organizations I thought taking an art education course would be helpful. Little did I know that it would change my life.

After finishing interior design, my heart was still on the thought of teaching art. I started researching and creating an art curriculum and started teaching in school. Every time I was in a classroom, I found my true self! I started training teachers in professional developmental classes. My dreams were coming true!

### OUR AMBITION AT PETIT BIZOO

is to be in a supportive, loving fun and creative environment. We offer students a vast variety of creative experiences that will acquaint them with art principles, materials and techniques that will promote their aesthetic sensibilities, creative mind and kinetic abilities.

### WE CHOSE PETIT BIZOO

As our name because it means "little kiss" in French –a warm expression of love which is how we approach art and children.
