														Leap Year Double Sunday ↗ = Sep 30 (Leap Day) + Oct 1						Annual Double Sunday ↗ = Dec 31 + Jan 1								

* The Leap Day (Sep 30, Sunday) can be the World Astronomy Day

The Basic WEcalendar (World Enduring Calendar) retains all existing 366 dates of the year.

It briefly composes of the first 9 months of 2012 and the final 3 months of 2017.

All quarters of the year always begin on Sunday with exact 13 weeks in 3 months.

Both the New Year's Day and the New Year's Eve are always on Sunday.

The Leap Day is set on September 30, Sunday. Then, it repeats annually...

* It introduces the least changes and can offer long-term economic benefits.

* It overcomes the drawbacks of the redundant annual calendar renewal.

* It is the simplest and most considerate calendar for all strata of society.

* It is the most practical civil calendar for governments and businesses.

The Week Numbering of *WEcalendar* ensures the compatibility of both editions.

The Leap Day (Sep 30) is fixed as Weekday 7 of Week 39 (W397)
The Leap Day is appended to Week 39 as Sunday in the leap year

The New Year's Eve (Dec 31) is fixed as Weekday 7 of Week 52 (W527)

In the leap year, the Leap Day of Sep 30 (W397) and Oct 1 (W398) form the Leap Year Double Sunday

The New Year's Day (Jan 1, W528) is part of the Annual Double Sunday

Except Jan 1 & Oct 1, weekday 0 of any week in the Sunday Edition = weekday 7 of the previous week of the Monday Edition

Except Sep 30 & Dec 31, weekday 7 of any week in the Monday Edition = weekday 0 of the next week of the Sunday Edition

														30 ← Leap Year Double Sunday = Sep 30 (Leap Day) + Oct 1							31 ← 周年双星期天 = 12月31日 + 1月1日							

永年日历 (WEcalendar = The World Enduring Calendar) 保留了所有现有的366个日期。

它只是简单地将2012年的前9个月与2017年的最后3个月结合起来。

每季度总是在星期天开始，持续3个月和13个整周。每年的除夕和元旦也是星期天。

闰日是在9月30日(星期天)。然后我们可以每年重复使用它。

永年日历克服了日历每年更新的缺点，也消除了不必要的日历功能。

这是社会各阶层最简单的年历，也是政府和企业最实用的年历。
